

MOVIE

Thor: Ragnarok

★★★★☆ | You wouldn't normally go into a Thor movie and expect a colourful comedy adventure movie. Considering that the movie is about the Goddess of Death taking over Asgard, that's the last thing on your mind. But this was before the Guardians of the Galaxy came out. We were apprehensive at first, since we weren't sure if Marvel should apply the same explosion-of-colours comedy format to every single movie of their own, but after Thor: Ragnarok, we guess they should, since they do it so darn well.

In brief, the plot goes something like this: Hela has taken over Asgard, and it's up to Thor to save Asgard (or whatever's left of it) with a ragtag of misfits hastily put together. Comedy ensues. We see a nod to the comics and the Planet Hulk arc. There are a lot of comic book references thrown in as well, so if you're into those, you'll need to keep your eyes peeled.

Thor: Ragnarok takes a lot of inspiration from Guardians of the Galaxy with the vibrant colours and the 80's rock music. If we had to describe Thor: Ragnarok in one sentence, we'd say that it was fun from the start to the finish. There wasn't a moment in the movie when we weren't entertained. Some are going as far as calling it the best Marvel movie yet. We won't go that far, but we're definitely of the mind that it is one of Marvel's best so far. It'll be hard to top this one.

MOVIE

Justice League

★★★★☆ | Warner Bros. and DC redeemed themselves after the global success of Wonder Woman. As fans ourselves, we did enjoy Justice League. The primary plot of the movie revolves around Steppenwolf searching for three mother boxes hidden around the world to destroy everything. Steppenwolf tried the same 5,000 years ago but failed miserably after fighting against Amazonians, Atlanteans, Green Lanterns and the Olympian Gods. After Superman's death and the presumed belief that there was nothing or no one to stop him, Steppenwolf comes back. Meanwhile, Batman has been recruiting to build a team of superheroes to fight the impending war that he saw through visions.

Several scenes were poorly executed which felt unnatural. There's a lot of inspiration taken from the comics. It would be wrong to take the same level of expectation that you hold from Marvel's quirky movies or the Dark Knight trilogy. If you're a DC fan and want to watch your favourite heroes comes together, don't miss it. We hope a director's cut happens soon and covers up some of the loosely held scenes and deleted ones. Oh, and there are two extra scenes at the end of the movie.

UP AND COMING

MOVIE

Downsizing

Solving the population explosion will soon become an important. Until then, Downsizing presents an interesting solution where we shrink

ourselves to avoid taking too much space on the planet. It will be fun to explore the challenges of little people in the movie.

Release date: December 22, 2017

MOVIE

Jumanji: Welcome to the Jungle

We've seen good reboots and we've seen some (really) bad ones. So we'll reserve judgements about this one. But hey, it's got The Rock in it and it's a tribute to Robin Williams.

Release date: December 20, 2017

TV SHOW

The Indian Detective

A new original series is set to release on Netflix. The Indian Detective revolves around a Canadian police officer who ends up investigating a murder when visiting his father in India. Sounds serious doesn't it? It's starring Russell Peters.
