DEVWORX

Lambda function 'EgginatorBackend'

Testing your Alexa skill

that allows a number of modifications to the output speech including 'speechcons' that are special words and phrases that Alexa expresses in a more colourful way.

It can be used to test and tune the responses that Alexa outputs in response to different intents. The other part is the service simulator that receives a sentence as input and shows the equivalent requests and responses that the skill would generate for it. There is also an option to listen to the responses within the service simulator.

Thats it! You can now test and debug your Alexa Skill.

ton. This sends the skill for review with the Alexa skill publishing team and you should hear back from them within a week or so with either a confirmation of the publishing or a few pointers on how you can improve the quality of your submitted Alexa skill.

Congratulations! You have now successfully created and published your very own Alexa skill. Do check out some of the resources shared earlier in this article regarding Alexa skill development. When you've finally built yours, do let us know at editor@digit.in so that we can give it a shot. 🇮🇳

PUBLISH YOUR SKILL

Once you are satisfied with the Skill you can go ahead and publish it, hence making it available for everyone. To do this, move ahead from the Testing page by clicking the 'next' button and you will see the publishing information page. Here, enter a few details like a short and a full description of what your Skill does, where you want this skill to be available and a few sample phrases that can be used to interact with the skill. Once done, you can publish it by clicking on the Publish but-
