

OKCupid enforces real names

OKCupid would rather you use real names for its dating service than use anonymous handles, but doesn't address privacy issues. <http://digit.in/OCRealName>

OnePlus could be sued

Due to the face unlock feature in the OnePlus 5T, the smartphone manufacturer could be looking at a possible lawsuit. <http://digit.in/OPLawsuit>

and many more for that matter and I still have that e-mail from Mr. Ajwani as the only starred e-mail in my inbox.

So I am not attaching a formal CV this time, I pretty much told you what I've done with my life. If you don't think I am too old or it's too risky to give me a chance, I won't let you down.

As I am writing this letter I once again feel like the teenager who used to tell everyone that Digit test centre is the only heaven he believed in. Thanks for making my teenage years awesome.

—A.B.

Wow. That letter gave us all orange eyes! And by that I mean we are tearing up. Thank you for the passion, and of course you can apply. Anyone can apply for a job here at Digit. We're not biased by qualifications, gender, age, caste or any made up classification of human beings. All we need is for someone to be passionate about technology, to the point of madness, and decent writing skills (which you already have). Send in your CVs. We do promise to be fair and honest.

—Mithun

Any plan to revisit the Jan-2008 Fast Track to "Tech Jargon".

—Swadhin

Not a bad idea. Let us see if there are enough changes to merit a part 2 of this. Thanks for the suggestion.

—Abhijit

Hey Guys, it really excites me to write to you for the first time though Digit has been my childhood love. Kudos to the team for such awesome content. I saw a suggestion in

Letter of the Month

I am so excited to write to you again. I have been a reader of Digit for the past 2 years now. Moreover I would like to thank you for making me an even better gamer than I am already by glorifying gaming.

I loved the December 2017 issue and the Zero1 Awards. I have a few suggestions and complaints.

Suggestions

- CAN WE PLEASE GO BACK TO NORMAL SKOAR AS A SEPARATE MAGAZINE?
- Zero1 Awards for feature phones....
- Monthly gaming contests
- Dmystify on Crypto
- A poster on old games like AoE 2
- Golden games like Super Mario, AoE, Bomberman etc.
- Bring Gangsta Granny! back
- A poster on geeky quotes
- Please overhaul the site
- 5 magazines and 5 CDs for the anniversary issue.
- Smartwatches Zero1 awards
- More articles for BooMan

Complaints

- The site is terribly designed. On the home page one cannot see many ads, but as soon as one opens any articles a barrage of ads come to greet you. I once got 7 advertisements from Oppo on a single article!
- For the December 2017 issue I

received 3 DVDs instead of 2.

- Price of iPhone X was Rs. 89000 on page 64 and Rs 102000 on page 69, that is a big difference
- Increase the length of Digit diary.
- Please bring the Esc column back.
- You gave Game of Thrones Conquest a good rating. It deserved O.

Some random questions to you all

- Are any of you active on Quora?
- Has any one of you invested in Cryptocurrency at all?
- Does anyone at your office create memes? If yes then please include the top 5 in the digit diary.

I shall never ever unsubscribe Digit. Hope digit goes To infinity and Beyond.

—Dhruv Dugar

WHOA! That's a lot of questions!

Answers to your suggestions:

- No, sadly costs are higher that way
- We don't really review feature phones, so we can't award Zero1 awards to things we don't review. Let's see if we can for 2018
- Not a bad idea, let's see what we can do.

- dmystify is for science only. But we will keep covering cryptocurrencies regularly.
- We are actually discontinuing gaming posters from this month for all but special issues. We're going to try Digit Auto posters for a bit now.
- Your wish is our command. Check the retro gaming SKOAR you hold in your hand.
- OK.
- We can try a geek poster on a special issue.
- Working on an overhaul as we speak.
- No way! Just not possible anymore with the prices being what they are. That issue would cost Rs 350, and no one would buy it.
- Maybe in 2018
- Agreed.

Answers to your complaints:

- Will inform our developers. That shouldn't happen.
- Gift the extra one to someone.
- Price difference is 64 GB and 256 GB versions. But we should have been clearer.
- Will ask Raaabo to consider it
- Same as above
- Hahaha. We'd love to hear your reasons why!

Random answers

- Not really. Too busy writing here.
- If any of us has, they've not told us.
- Good idea. We actually do have internal memes.

—Mithun
