

Facial recognition for chickens?

A Chinese company is working on facial recognition for chickens so that people can track organically farmed chickens right from the farm. <http://digit.in/ChicknFace>

sive. And we don't want that, not with my power supply. So I proceeded to unleash copious amounts of hot glue onto the first inductor coil within the primary section. That, unfortunately, did not help. I repeated the same with the other inductor coil and finally, success! The darned thing stopped

whining but the battle is only half won. I then opened my main PSU and applied an equal amount of hot glue onto the inductor coil. That worked as well. I can use my PC without the nasty irritation now but I know the interference exists. So until I can get an electrician in to rewire my line, this will do. 

BUYING ADVICE

HEADSET UNDER ₹10K

Q I have the budget of ₹10,000 and I really need the best sounding headphones to go with my Hi-Fi QUAD DAC in LG G6. I'm strongly leaning towards Audio Technica ATH-M50X but I want to explore other options as well. I'm not a bass head and bass is not at all the deciding

factor for me. I just need the best sound that a ₹10k headphone can provide.

—Vikas V.

Sennheiser
HD 598 CS

A The M50X is great but not very comfortable for long listening. If comfort is a concern, the Beyerdynamic DT 770 PRO (32

Ohm variant) is a better option. The semi open and brilliant sounding AKG K240 MKII is also totally worth the extra ₹1k. My recently purchased Sennheiser HD 598 CS isn't studio grade but gets the job done and is super comfortable.

Personally I'd go for any of the other three options instead of the M50X. It's a good second headphone to have. Not a good daily driver.

BUDGET AUDIO

Q Hey, I am planning to buy earphones under ₹1k and am having trouble deciding which one to pick. I have shortlisted Brainwavz Omega and IMore Piston. I want a microphone and good sound quality. Good bass would be good but not too high bass. I currently have CX 180 and

A Actually, both the Omega and Piston Fit are good with the Piston Fit being slightly better. The KZ ZST is an even better option if you wouldn't mind waiting 20 days or more, for the package to reach you from websites like Gearbest / Aliexpress.

—Vinay Bomma

Z370 OR Z390?

Q Hey Agent001, I really like your articles and I believe you can help. I'm planning on upgrading my system, I saw that the new Intel 8th Gen CPUs are better than the AMD Ryzen CPUs so I wanted to build an Intel Core i7-8700K system. When I was reading up, I saw that the Z390 boards are rumoured to launch soon. Should I wait?

—Ravi Singh

Upgrade?

then go right ahead. The Z390 chipset is slated to launch in H2-2018. Long answer, there are more 8th Gen CPUs coming in Q1 2018, so you'll see the entire lineup of the 300-series chipsets including the H370, B360 and Q370 launch in Q1. So that'll provide you more options, budget-wise. In a similar vein, AMD's improved Ryzen 2 CPUs codenamed Pinnacle Ridge will launch in Feb 2018 along with a new 400-series platform. So if you can wait, I'd suggest you wait three more months.
