

Digit's Test Labs see a lot more products than what we feature in the magazine, so if you've got a hankering for more reviews there pull out your smartphones and scan these QR codes.

LAPTOP

RDP Thinbook 1110

While there are plenty of machines in this range, it's tough to recommend any of them. Sometimes the display is not good enough, while performance just won't cut it in some. To be fair, a sub-15K laptop leaves little room for decent specifications. Still, with growing demand and steady drop in hardware prices, the Indian laptop market now offers various options in the sub-15K segment.

One such laptop is the RDP Thinbook 1110. It has an MRP of around ₹18,000, but is currently available at ₹13,999.

SMARTPHONE

Kult Gladiator

At ₹6,999, the Kult Gladiator offers quite a lot. There aren't many phones in this price range that offer a reasonably large screen along with 32GB of internal storage. While performance isn't a strong suit for the phone, the camera was surprisingly decent. It's a phone you can consider, though it's far from being the best. The most obvious competitor to the Kult Gladi-

ator is the Xiaomi Redmi 4A 32GB. It offers better performance, an impressive camera, and is a more reliable phone overall.

SMARTPHONE

Xiaomi Redmi Y1

Xiaomi is one of the most prominent names in the budget market. The company has multiple options available for its customers, starting from ₹5,000. Among these is the relatively new Xiaomi Redmi Y1 smartphone. This is the company's first foray into the selfie-centric smartphone market, which is primarily dominated by Oppo, Vivo and Gionee. However, with a price tag of just ₹8,999, the phone is squarely aimed at the budget-centric audience. If you can't extend your budget, the Redmi Y1 is a good option. If not, the tried and tested Redmi 4 is still hard to beat.

SPEAKERS

JBL Pulse 3

When you think of a Bluetooth speaker you generally think of a small square or round shaped device that is lightweight, portable and has a functional design. With its Pulse series, JBL changed that. The pulse series of JBL's Bluetooth speakers give you a visual treat in the form of an LED show on the exterior of the speaker. Now in its third generation, we have the JBL Pulse 3. But at an asking price of about ₹15,000 is it the best option out there?

STREAM

Amkette EVO TV 3 4K

One of the drawbacks of these smart TV's is that despite being internet enabled or "smart", they don't offer the best experience when it comes to consuming content from services like Netflix, Amazon Prime and more. If you want to make the most of these services, you will need to invest in a streaming box. If playing locally stored content is what

you are looking for then you can consider the Amkette Evo TV 3 4K. If it's 4K content streaming services that you want, look elsewhere.

CONSOLE

Microsoft Xbox One S 500GB

One can't ignore the fact that the console is a year late to launch in India. If raw performance is what you are looking for, then you may want to hold your horses for the Xbox One X. Sony's PS4 Pro is already available in India at an MRP of ₹38,990 and if you know where to look, you can get one without warranty for around ₹33,000. If you have the original Xbox One, then upgrading to the Xbox One S isn't necessary as the upgrade

isn't significant. You may want to hold off for the Xbox One X or consider the alternative i.e. the Sony PlayStation 4 Pro.
