

GEEK CULTURE IS OUR WAY OF LIFE, AND ENCOMPASSES MOVIES, GAMES, COMICS, AND TRENDS FROM ACROSS THE GLOBE

INSIDE

THIS MONTH IN CULT:

Chatbots are all the craze today, from ordering food to telling you jokes. And giving you a career too apparently! But enough serious talk, how about a journey into the Indian comic book scene? And if even that doesn't improve your mood, maybe you should go on a rant about malware or read one here.

Superman's black suit

Henry Cavill and Zack Snyder teased the Superman black suit on social media, hinting that we might be able to have a look at it in Justice League. But it didn't make it to the final cut, but scenes with the black suit were definitely shot.

WHAT'S NEW

Thanos' badass moment in the first five minutes

Although each movie in the Marvel Cinematic Universe has its own villains, they are no match to the Titan. Marvel

Studios has been building the character of Thanos for several movies and Infinity War is going to be one where he'll be taking full control and finally come out of his post-credit scene limbo. Thanos' coming has always been given the gravity that something terrible is on its way to the Avengers, and that is exactly what's going to happen in Infinity War. Marvel Studios president Kevin Feige mentioned that the first five minutes of the movie is going to display the might of

Thanos. This will not only show what the Titan is capable of, but establish why he's the biggest and baddest villain in the MCU. And we are guessing that the first five minutes will see a lot of deaths, probably the death of an Avenger as well.

The Disney and Fox merger

A lot of rumours had been going around the possible merger of entertainment giants Disney and Fox. Finally, the biggest merger in the entertainment industry has happened, a staggering deal of \$52.4 billion. This means that Disney will now control more popular franchises like Fantastic Four, Deadpool, and X-Men. Disney has been buying out several studios and networks for the past few years, building their

own entertainment empire. Their previous acquisition of Lucasfilm and Marvel has worked out well considering the success that both have witnessed after the merger.

The merger also includes all the movies and projects under Twentieth Century Fox and TV studios. Disney has plans to launch its own streaming service in 2019 and is also pulling their content from Netflix in the same year. With so many franchises under their wing, not only does the future of the MCU look infinite, their other projects on TV might also just bring in more success.

Episode IX has a working title

With J.J. Abrams brought in to direct the final chapter of the current trilogy, Star Wars: Episode IX finally got a working title called Black Diamond. These titles have always been irrelevant to the movie, so don't waste your time trying to figure out any reference.

New Venom set photos out

Work for the Venom spin-off movie kicked off a few months back and set photos have leaked out. Tom Hardy, playing Venom, is seen filming a brutal fight scene with Scott Haze. There's no Venom or Carnage suit on any of them, so we aren't sure about Haze's character.
