

digit diary

If you are ever curious about what the **Digit gang is up to**, this is the place to get all the inside info. From the **latest game we're obsessing about** to the newest intern we're driving up the wall – it's all here folks.

It's that time of the year again where we all have to get used to writing 2018 as the date instead of 2017.

It's been a month now since Sid left and while we'd like you to tell us that we're indifferent, there's definitely a void in the office. Fortunately, **we have a returning Digit veteran. Aditya, who was first with us waaaay back in 2008**

is now back, a decade later. While he should probably feel right at home, it's all new faces in the labs so he's still kind of the new guy. The only face he would have recognised left last month! Of course, there's still big boss Raaabo, who knows everyone who left and joined

for the past 16 years! But we don't mention him a lot because he's taken for granted... kind of like the furniture :P

Since Sid left, Mithun has taken up the mantle of managing us Mumbai rogues, and he likes ruling with an iron fist. To better rule his minions, he has ventured out of his dark cave (a corner in the labs where he fiddled inappropriately with hardware) into the

light. And by that we mean Sid's old seat. He also gets to participate in all the conversations now, and doesn't have to yell "Kya bola?!" from across the labs anymore.

We keep saying we'll start streaming regularly

over here, but we never seem to get to it. We have taken a stab at it recently though, and we're trying to branch out. You know, more than just CS:GO and PUBG. If you guys have any suggestions as to what you want us to stream, write to us. **Heck, join us, and you can play with us live while we stream!**

Since we're (finally) done with Zero1 Awards, we're having to bid goodbye to all the fantastic products that came in for review. We'll miss playing with those expensive goodies. But on the bright side, at least we will finally have room to move around – because we were literally waist deep in products for this entire month!

On a final note, we'd like to wish all of you a happy new year and hope you had a good 2017. Here's to an even better 2018!

QUOTE OF THE MONTH

*Mithun: What are you?
Arnab: I'm Cancer.*

everybody but Arnab collapses in laughter

DISCUSSIONS

Every month we will highlight some of the more interesting discussions happening on our Digit Forum (digit.in/forum). Head over and join our forum if you want quick answers to your queries from some of the geekiest Indians online. In case you love giving gyaan, or even if you love arguing with others, the Forum is the place you should be.

Keylogger discovered in HP laptops

<http://dgit.in/HPKeylog>

According to Synaptics Software, 460 different models of HP laptops including the EliteBook, Pavilion, and ProBook series, contain a bug that records your keystrokes. Join our forum members and have a nice rant about it.

Infinity or Edge display on smartphones

<http://dgit.in/EdgeDisply>

Looking for a smartphone that specifically contains the highly advertised Infinity display or bezel-less displays? The community is discussing the phones supporting it while busting a few myths surrounding them.

Intel Core 8th Gen build

<http://dgit.in/Intel8thGen>

The spirit of our forum is displayed whenever someone wants to build a PC with preferences, and the entire community pitches in to help them out. One of our members wanted to build a new system with the latest 8th Gen CPUs and the others delivered...
