Dying star birthes black hole pair?

Researchers are investigating gravitational waves to determine if a dying star birthed binary black holes. <http://digit.in/StarSuck>

BREAKING THE HABIT DOWN

We dive deep into what addiction does to the human body

Arnab Mukherjee | arnab@digit.in

E

very day, 22 year old Harsh wakes up early in the morning. It had become a routine, one that he

had no control or choice over. He is usually out of breath, under stress and

always on the edge. But it's not a chronic ailment or an infectious disease that is bothering him – he just hasn't had his fix in a while.

What is his fix? It could be anything from substance-abuse (alcohol, marijuana etc.) or otherwise (gambling, shopping, the Internet, gaming etc.). And everyday, countless people like Harsh wake up to another day

where their lives are affected by their addictions – mostly in a very bad way. To understand their plight, one must understand addiction itself, and what it does to the human body. But first...

...TAKE IT SERIOUSLY

Addiction and its effects are not to be taken lightly. There is a certain tendency to label one's affinity to-
