ISSUE 02

Terrified of Tech

Technology will be breaking new boundaries this year too and will be capable of all new ways to do you harm.

SCIENCE - PAGE 70-79

72 | Siberian permafrost explosions

Craters in the northern reaches of the Russian tundra are a large scale environmental disaster.

74 | Not a walk in the park

How close are we to building a robot that moves like a human being?

76 | 'Oumuamua

An asteroid ejected from the an alien system zipped past the Sun, and astronomers rushed to study it.

78 | Why is antimatter so rare?

Antimatter is incredibly expensive to create, very hard to store, and is extremely unstable.

AND MORE

CULTURE - PAGE 62-69

66 | Geeky movies of 2018

2017 gave us a lot of movies to geek over, and 2018 has even more in store!

63 | Millenials are killing words

The "news" sites catering to bored millennials, are leading the charge when it comes to pulverising the meanings of newfangled words.

64 | Way too Late

Late tech launches in India have finally hit a nerve with Booman.

69 | Good guy Bungie

In response to a wave of criticism, Bungie wants to change Destiny 2, in a good way.
