

Lost Superman story

On the 80th anniversary of the Man of Steel, DC is going to publish a lost story from the original creators. <http://digit.in/LostSupes>

Spy balloons vs smugglers

The US military is resorting to spy balloons that fly at a height of 40 km to track drug smugglers on the ground. <http://digit.in/SpyBlon>

quite often these days and we've done CS:GO way too many times to count. For your second query, you are right in figuring out that the 3570K is indeed a very good processor, especially for gaming. It can also be overclocked should you notice any bottlenecks in performance. We say stick with it for at least one more year.

—Mithun

 I am one of the many readers of your magazine. I am an employee of iBASEt India Software Pvt Ltd, and we have a subscription to Digit magazine. I have one suggestion. While reading the magazine under a room's light or in direct sunlight, the pages are very reflective and it affects the readability of the magazine. Please see if you can change the paper quality. Apart from this, thank you for a great magazine.

—Milkan Kamboya

 I promise to look into this Milkan, and see what we can do. However, it will take some time, as changing paper is no small matter for magazines like us. Paper has to be bought in bulk, and deals are made well in advance. For example, I think we have paper for the next four months of Digit already, and I'm pretty sure our next order for a bulk amount of paper is already loaded on to the cargo ships and is on its way to India. We import paper from countries like Norway and Finland, and they take months to reach us. This is because that paper is responsibly sourced from paper plantations that plant and nurture far more trees than they cut down, and have green certification, so we are not responsible for any environment damage.

—Robert

 My name is Aakash Chadha and I'm 26 years old. I live in Jaipur, Rajasthan. I love reading Digit and its enclosures. For this reason I have an annual subscription of digit.

Now from quite some time I'm looking for company of some like-minded individuals who are technology enthusiasts like me or may be interested in entrepreneurship in tech field.

So could you please refer me some names and contact numbers of people

from Jaipur region of my age bracket who have subscribed to Digit magazine in the past. We all may share common interests and passions which will help in forming a good group of avid Digit readers.

—Aakash Chadha

 You know Aakash, the Digit Forum (geek.digit.in/community) is perfect for things like this. We are sure you will find a lot of like-minded individuals on there, and also on our Facebook page. Take the lead and we are happy to help you, and others like you, to form interest groups amongst Digit readers (and geeks in India, in general). Just let us know how we can help, and we will try and connect all of you. It doesn't have to be for business either, if you have an idea about starting a group for like-minded individuals in any area of technology, write in to us and let's see what we can do to build that together.

—Aditya

 Hey there , I think it's too late to open the December issue at the end of the month (due to exams) but, when I saw the "GEEK CALENDAR" It's awesome...

Thanks a lot guys .

In fact you guys helped to get rid of exams tension. Whenever I'm fed up of studies, you guys made me to sit back and start learning something that my college didn't teach me!!!

Thanks a lot guys

—Channa Channu

 Thank you for the feedback. I hope you enjoyed the calendar even half as much as I enjoyed making it. It was a challenge, but a very fun exercise. Please send in suggestions for what you'd like to see in our anniversary issue that's coming up in June.

—Arnab

 **Part One: Written on 9th January**
Greetings Team Digit. My mail refers to your December issue. I've been reading Digit for two years (which is nothing compared to your large Fanbase). It's sad that there is going to be some personnel changes (I wish

Siddharth best of luck). I think it's great that Digit has broadened it's horizons, like the article on man-made earthquakes was really interesting.

The Zerol awards were pretty good. The jurors were pretty great.

As usual the content of the rest of the magazine was amazing. (Especially 'Rules of Fiction' and 'Careers In Robot Cars?') There's nothing to criticize, really, except for Boo-Man and Digit Auto. I don't understand why he detests Apple devices. When I come to Digit Auto, I feel that it would be better if you do car comparisons with greater depth.

Part 2: Written On 18th January

This refers to your January issue.

1. This was an improvement over the December issue. Though I missed Siddharth's editorial.
2. The article on mental health startups was really cool. The fact that chat-bots can now sympathize with us is a little unnerving, but dope.
3. Boo-man: Sorry for my criticisms in part one. I installed Firefox Quantum on my computer. And yes, it's far better than Chrome!
4. The cover story has made me realize that A.I, whether we like it or not, it's coming. Though, I hope it doesn't turn out like Skynet. (The Terminator gave me nightmares.
5. Not a huge fan of the Auto poster.
6. For Souvik: The platform that Mr. Bose was talking about is internally known as 'AMP' or 'Advanced Modular Platform' by Tata engineers.
7. SKOAR! was lovely as usual. I am a huge fan of South Park. Anyone knows Rick and Morty?
8. To summarize, you guys are a bunch of really cool people who I hope continuing this for the rest of your lives. Cheers.

—Marvin Nathan

 Thank you for your email. Most of it is comments rather than questions, so we have nothing to add. We also hope that we will continue to do this for the rest of our lives! There's no one cooler than Digit readers though. You guys rock!

—Robert
