

digit diary

If you are ever curious about what the **Digit gang is up to**, this is the place to get all the inside info. From the **latest game we're obsessing about** to the newest intern we're driving up the wall – it's all here folks.

Wasn't it new years just yesterday or something? We're already a month down!

January is usually pretty packed, what with CES happening around this time every year. As usual, things were pretty slow in the labs, despite managing to close the issue somewhat on time last year. Month. Last month.

This month's delay could probably be attributed to three out of the five people in the labs grinding it out on Warframe. Or Grindframe as some people very rightly call it. Mithun had decided to try the game out

for a streaming session and he got hooked. Manish, who had played the game before picked it up as well and long time Warframe veteran Aditya was happy to have the company.

Meanwhile, Abhijit, who has racked up quite the playtime on PUBG, decided to join a tournament along with Siddharth, who plays PUBG just about all day. **The two were ready to break into the pro scene, guns blaz-**

ing, in quite the literal sense here. Unfortunately, they never it made it past the qualifiers. There go their dreams of going pro.

This month, a BMW i8 made it way to the labs for review. An i8! What a beast of a car! Too bad we

couldn't push it to its limits on these roads. The best – well technically, the worst, but we're all sadists here – part was that Siddharth wasn't here to bask in the car's glory. We made sure to point that out to him several times.

Speaking of us being sadistic, we've got new interns on the way. **We're already rubbing our hands together in evil villain-esque fashion in anticipation of their arrival.** Or we would if weren't buried nose-deep in Warframe.

We had to stop streaming for a bit thanks to closing but we'll be starting again soon, and hopefully we'll be far more regular this time around. We're still trying to widen our pool of games, so do reach out to us and let us know what you'd like us to play, and as always, you can even join us!

QUOTE OF THE MONTH

"Do u kno da wae?"

DISCUSSIONS

Every month we will highlight some of the more interesting discussions happening on our Digit Forum (digit.in/forum). Head over and join our forum if you want quick answers to your queries from some of the geekiest Indians online. In case you love giving gyaan, or even if you love arguing with others, the Forum is the place you should be.

Meltdown and Spectre CPU bugs

<http://digit.in/specmelt>

Security researchers have identified two of the most critical vulnerabilities in modern CPUs. The community members are discussing the patching process, which involves using the bios update for motherboards from particular manufacturers.

Satyapal Singh debunks evolution

<http://digit.in/singhevo>

MP Satyapal Singh has debunked evolution by pointing out that there was scientific evidence against the theory. The forum members are wondering what Darwin's political motives were, and if Indian mythology has any parallels to evolution.

Lax security is the user's fault

<http://digit.in/userfault>

While the US and UK alleged that threat actors with ties to North Korea carried out the WannaCry ransomware attack, the forum members have pointed out a firefighting attitude towards cybersecurity enables malware to spread.
