

Call Quality Ratings

Call quality ratings over the last few months, across the states and telecom service providers are available in the Open Data Portal maintained by the Government of India. Here are some insights that can be gleaned from the data.

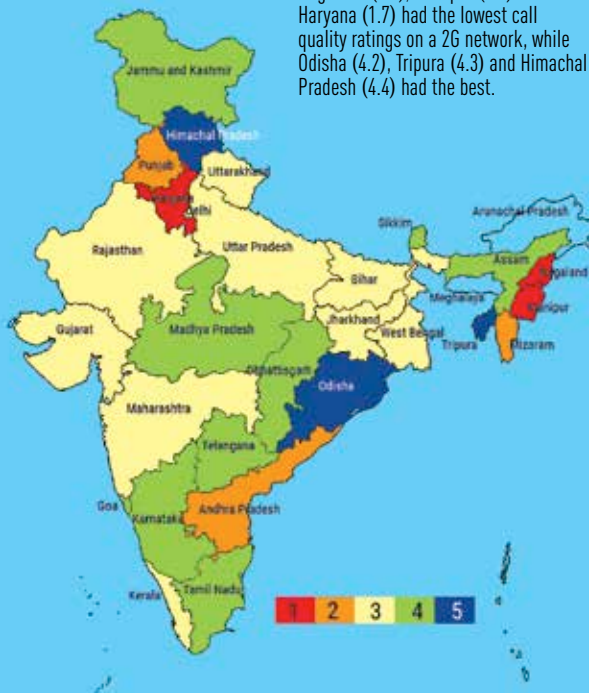

Average

Although the network type has technically more to do with the data transmission rate than the voice call quality, users did report significant differences in call quality based on the type of network provided or available. Overall, Call quality rating was highest in the state of Himachal Pradesh, with an average of 4.8, and lowest in Mizoram, with a score of 1.9

2G

Nagaland (1.0), Manipur (1.0) and Haryana (1.7) had the lowest call quality ratings on a 2G network, while Odisha (4.2), Tripura (4.3) and Himachal Pradesh (4.4) had the best.

3G

Call quality on a 3G network was the best in Himachal Pradesh (4.9), while Manipur (1.1) got the lowest score. Mizoram (2.2) and Andhra Pradesh (2.2) do not enjoy great connectivity as well.

4G

Himachal Pradesh (4.8) had the best call quality over a 4G network as well, while Mizoram (1.7) had the lowest score, again.
