LARRY PAGE'S GOOGLE 3.0

Business Week gives us a very detailed account of what really goes on behind the closed doors of Googleplex. Learn how the imperial triumvirate of Google - Sergey Brin, Larry Page, Eric Schmidt - bring together their near-sovereign chieftans of Google's far-flung product groups into a single room and harmonise their disparate initiatives.

2G, 3G, 4G, AND EVERYTHING IN BETWEEN

Wireless has come a long way from when cellphones caused more than just a little bulge in your pants. But through the years it's dropped so many 'G's along the way, it gets confusing to keep up. Sure 4G is one G higher than 3G but what the hell does that really mean? And what is 2.75 G? Did you even know about it? This Engadget wireless primer is for you
