

For sure shot
Home PC safety...
...Kaspersky
Pure
Total Security

Now you can safely leave your kids online, carry out financial transactions and even store confidential data on your home PC. Kaspersky Pure ensures ultimate digital protection for your home PCs by helping you to centrally manage their security from any PC on the network. It offers a **Data Backup** and **Restore Feature** that keeps valuable data and files safe.

Sure Safety Features:

- **Malware and Spam protection** - including new enhanced detection and sandbox technologies for strengthened safety
- **Enhanced Password Protection** - creates, encrypts and stores logins and auto-complete forms
- **Advanced Parental Control** - helps monitor kids' internet access as well as PC and application use
- **File Shredder** - makes deleted data unrestoreable, even with sophisticated data recovery software
- **Data Encryption** - maximizes security through password protection and encryption to control access to confidential files
