WE SAY

For a Bluetooth headset, the Plantronics Discovery 975 packs in a lot of features and snazzy looks. The pairing process is a bit tricky, but the performance on offer is good. The charging case is like a charger on the move to keep the 975 topped up. A bit pricey though.

6.5

The phone offers a built-in projector, which means that the form factor is slightly bulky. The projector offers very basic performance. The keypad has a slightly weird design, with the number keys above the navigation keys. This makes the phone a tad uncomfortable to use at first.

6.0

The Intex IN4400 is focused at the budget buyers. If you can forgive the weak camera, you should consider buying this phone, as we've not seen a phone with better feature set in this price bracket. Go for Intex IN2060 for a better camera.

6.0

It can charge off any ambient light source and offers very good battery life. A battery level monitor app is available for download. It functions well within a 20 feet range with hardly any lag. The deck sports scalloped, chiclet keys which are nice to type on. Worth it if you can afford the price.

WE SAY

It's slower than ZOTAC GTX550Ti AMP Edition, MSI N550GTX and Palit GTX 550Ti Sonic, and yet priced much higher. The only good aspect about the card is the cool performance under load. We find it hard to recommend at over 10k.

6.0

Its performance is similar to the reference AMD HD6850. 3D Mark Vantage: 14686; Crysis Warhead (1680x1050, Very High): 28 FPS; FarCry2 (1680x1050, Ultra, 4xAA): 71 FPS. There are much better options available at the price of ₹14,000. Makes sense under 10k.

5.0

It comes pre-loaded with the Android OS. It delivered mediocre scores across most of the synthetic benchmark tests. Gaming frame rates are barely playable. The long battery-life (250 minutes) is its major strength and aptly fits the bill for a low-end netbook.

6.0

Sequential Read/Write (MB/s): 84.45/85.33 and Assorted Read/Write (MB/s): 66.06/42.01. Intra-drive transfer speeds are around 25MB/s. At ₹6,000 we find the Hitachi drive hard to recommend as Samsung HM100UJ 1 TB drive with better performance, is for ₹3,500.
