

Let your business TAKE FLIGHT with colour.

Stop to think of it and you'll realize just how universal and eloquent the language of colours is. Red stands for passion, anger, love. Green signifies new life, nature, wealth. Well defined associations lead to faster recognition of a message than the written word. Everybody wants to win Gold. As a business, you too can harness the power of colour to create a stronger impact.

Using the power of colour to sell

The best brands across the world harness the power of colour to create a desired response in their customers' minds. Red for dynamism, blue for stability, splashes of bright colours to denote vibrancy. If you run a home or small business, you too can use colour to your advantage.

HP LaserJet CM1415

Sell your ideas more effectively in colour. A brochure or a leaflet that's printed in colour communicates up to 70% faster, and 77% more effectively as compared to black and white¹. You can capture people's attention better with colour because people are 55% more likely to pick up a full-colour mail piece first. Information retention increases by an average of 65% when it is printed in colour¹. You also increase your chances of being paid promptly due to the fact that coloured invoices can be located 70% faster. Payment response improves by up to 30%¹. Makes sense to shift to colour doesn't it?

HP LaserJet CP1525nw

No cost increase for black and white prints

Choose smart, innovative printers like the HP LaserJet Pro CP1025 Colour Printer. It's the world's smallest colour laser printer and one of the planet's most energy efficient². Print black and white at that same cost as that of a black-and-white printer!

HP LaserJet CP1025

Printers like the HP LaserJet Pro CP1025 Colour Printer indeed offer the best of both worlds – the impact of colour to boost your business and the affordability of a black-and-white printer for black and white prints.

- The most visible colour is yellow.
- The most legible colour combinations: Black on Yellow and Green on White followed by Red on White
- Black on white is the easiest to read, on paper, and on computer screens
- Hard colours (red, orange & yellow) are more visible and tend to make objects look larger and closer
- Soft colours (violet, blue & green) are less visible and tend to make objects look smaller and further away
