Galaxy GTS 450 won the Best Buy in the ₹5,000 to ₹7,000 price bracket thanks to the factory overclock which edged it past the other GTS 450s.

Finally in the under ₹5,000 price bracket, XFX HD 6450 emerged as the Best Buy for its economical pricing. If you want a decent gaming card in this budget then it is better to

go with HIS HD5670.

This battle was a whitewash, with NVIDIA cards winning all the major prizes. Poetic justice we would say, as last year we had most AMD cards out-

performing the NVIDIA ones. We cannot wait for both the companies to come out with their next generation cards by the end of this year or early next year.
