mini ^{QUICK} INSIGHTS FROM INDEPTH TESTS

The Digit Test Centre receives hundreds of products every month. Each of these products is put through a series of tests, and is finally given a verdict. The final score is arrived at after considering a number of factors and evaluating them in terms of features, performance, value for money, build quality, and, in the case of software, even ease of use.

For better understanding of our ratings, here's a quick guide to our overall score

- 1.0 - 3.0 - Extremely poor product. Keep away!
- 3.5 - 5.0 - Strictly OK. Not recommended
- 5.5 - 6.5 - Decent product. Go for it, but there may be better products out there.
- 7.0 - 8.5 - Very good product. Highly recommended.
- 9.0-10.0 - Ground-breaking product. We've never seen anything like it before. A definite must buy!

Social headphone

The Zumreed X2 Hybrid, a set of headphones which can double up as speakers as well

TEST CENTRE RATINGS (All Scores out of 10)

Features.....7.0

It has a USB 3.0 port in the front and a transparent acrylic side panel which will allow you to show off your system. The 3.5-inch HDD bay is detachable.

Performance6.0

Things were moderately warm on stock coolers. CPU delta reached 60 degrees, GPU delta reached 48 degrees celcius.

Build quality7.0

Despite having a transparent side panel, it is quite sturdy and does not bend easily.

Value for money5.0

Priced higher than the Elite 311 despite the only changes being an extra USB 3.0 port and acrylic side panel.

Features.....7.5

G'Five G20 is a dual SIM gaming phone with a gamepad and amazing speakers with Yamaha amplifiers.

Performance8.0

Its gamepad has good precision, and reactive buttons along with a 2.4-inch screen that shows vivid colors. The speakers are loud and battery draining.

Build Quality.....6.0

The body of the phone is made with hard plastics which are a little flimsy.

Value for Money.....8.5

At ₹2,500, it is an amazing gaming phone that deserves all the accolades thanks to its core features and others like Analog TV.

WE SAY

6.0

Cooler Master Elite 311 Plus makes for a good entry level cabinet at the price. The cabinet has USB 3.0 ports on the front which is quite a good feature to have, although we would have loved to see at least two for connecting various other USB devices. For a high end gaming rig, you do need something more than a stock cooler to keep things inside cool. We still feel that an almost ₹1,000 jump for a single USB 3.0 port and transparent acrylic sheet isn't worth it. Slightly steep at its current price, but if you manage to snag this one for ₹2400, it comes recommended as good.

8.0

Quite the revelation, this G'Five G20 gaming phone. We didn't expect a whole lot at the price but it surpassed our expectations. The G'Five G20 has a bar design form factor with a multi-directional touch pad and a plastic numeric keypad below it. The most impressive parts of the package are the gamepad that connects to the phone via USB, and the good sound experience.

G'Five G20 portrays true dynamism in its segment, for both price and features, and also the accessories that are bundled within the package. No doubt that this is a very good phone at the price.
