HP LaserJets

¹Based on competitive TEC data found in energystar.gov, eu-energystar.org, the HP Carbon Footprint Calculator at hp.com/go/carbonfootprint and manufacturers' published data sheets. ²For desktop HP LaserJet printers, HP's Auto-On/Auto-Off feature will help imaging and printing customers use 3 times less energy than in a device's normal sleep mode, automatically powering down printers after a period of inactivity and putting them into a mode that uses less than one watt of power. HP will pre-configure printers to power down automatically after a set amount of time, ranging from one to 30 minutes, though Auto-On/Auto-Off technology offers customers the ability to customize and pre-set their own off times for the printer. This proprietary technology works in concert with Instant-on Technology, which enables customers to produce the first page faster when a printer is coming out of sleep mode. Based on comparison to the HP LaserJet P1005 Printer. ³HP Auto-On and Auto-Off capabilities subject to printer and settings. ⁴HP Smart Install works with Windows® only.
