

GOOGLE CALENDAR

Google Calendar is an awesome time-management offering from Google. Apart from organising your schedule and letting you share events with friends, Google Calendar has a trick or two hidden up its sleeves. We bring you some of the better ones which will make you a Calendar Ninja.

Export Facebook events to Google Calendar

Facebook is a great way to get in touch with people. Apart from that it also has a feature called Events, where you can organise events, respond to invites and keep up with what your friends are doing. Facebook is also a great way to keep track of birthdays of your friends. You can export both events and birthdays to Google Calendar. Just go to the Events section on your Facebook page. Click on the export link to bring out a pop-up window, copy the URL. In the Google Calendar window, click on the down arrow near "Other calendars" and select "Add by URL". Paste the link in the dialog box that follows and

Tips & Tricks has its own page numbers, and does not follow the rest of the magazine's page numbers. This is done to ensure that you can cut out and save T&T in a separate folder for later reference.

you're done. Facebook events are now imported into your Google Calendar. Similarly, you can also export birthdays of all your friends to Google Calendar.

Syncing Google Calendar with mobiles and other applications

You don't need to log into Google Calendar through your web browser to enjoy the benefits of the service. You can use it from anywhere you want, even your mobile. Starting with PCs, you can sync Microsoft Outlook with Google Calendar to do so, download the Google Calendar Sync utility for Outlook from goo.gl/7Ugu6 after installing it, select the appropriate sync options and time interval and you're done.

You can also sync iCal on your Mac or Mozilla Thunderbird with Google Calendar. This is done using CalDAV (a web standard for accessing scheduling information on a remote server). You just need to add a new calendar that points to the Google Calendar servers, you can find detailed instructions at goo.gl/LPrkk. Google Calendar supports Android, iOS, BlackBerry, Symbian and Windows phone. Android has Calendar available out-of-box and the

experience is specifically optimised for Android and the best among all other platforms. To get Google Calendar on your mobile, scan the given QR code. It will take you to the Google Sync Website. Once you're there, download the application, and add your Google Account details and other sync options and you're good to go.

Appointment Slots

It's a recent addition to Calendar. Say you have a swimming pool or a conference room you want to share with your friends or colleague. You can use Appointment Slots to allocate a resource to one person. To use it, just click on Appointment slots when you see the pop-up dialog after clicking on a time-slot in the calendar. Fill in the details, by going to "Edit details". Copy the URL on the top as the guests will be able to
