Aman Maharshi Aroni Das but its not

January 19 at 8:06pm · Like

Aroni Das Looks like a screensint of windows. Besides, the os is too cramped to be used on a touch screen

January 19 at 8:48pm · Like

Aroni Das And, most importantly, android runs on a linux cernel, and the phones are optimized for that. Windows is much different from linux, so theoretically, it's impossible to run windows

January 19 at 8:50pm · Like

Aroni Das And, I can see your notification bar. That proves you're still in android. The thing you're saying is windows has to be some wallpaper or launcher

Digit in Vegas

Even chicks dig it!

Apart from having a great time at CES 2012, we didn't spare any effort from introducing Digit to members of foreign press and exhibitors. And some of them were only too happy to pose with our January issue. You have to admit it's a photogenic combination.
