

Samsung's Wi-Fi optical drive

Samsung introduced a Wi-Fi optical drive doubling up as a cloud storage, access point and for streaming media
<http://bit.ly/z54siV>

Lenovo IdeaPad YOGA

its hinge is patented. It offers users the option of a touch-input tablet and a traditional keyboard-enabled operating environment on a Windows 8 operating system. The product weighs similar to a netbook and is slim and compact, in line

Lenovo IdeaCentre A720

with an ultrabook's dimensions. It's expected to launch soon after Windows 8 launches. The indicative price is \$1,199 or ₹60,000 approx.

Consciously trying to reposition itself as not just a PC maker but a personal technology and computing company, with products ranging from smartphones, tablets and TVs, Lenovo went on to unveil a first-of-its-kind 55-inch Smart TV called Lenovo K91. It's unlike

any TV we've seen before or anything available in the market — it has an IPS panel which offers great viewing angles and colour levels. The K91 supports 3D viewing, comes built with a dual-core 1.5-GHz Qualcomm Snapdragon processor and if all that wasn't enough, it also

Lenovo IdeaPad S2-10

runs Android 4.0 Ice Cream Sandwich. So yeah, it's definitely not your ordinary TV. What's more, the thing also comes with two remotes: one for flipping channels and the other a gamepad for serious gaming. We personally took Gameloft's

Lenovo K91 55-inch Smart TV

Asphalt 5 for a spin on the Lenovo K91, and enjoyed playing it with the dedicated gamepad. We also recommend watching the TV's demo videos included in this month's DVDs.

Those weren't the only products showcased at Lenovo's CES 2012 booth. Check out this month's DVDs for some exclusive video coverage of Lenovo's exciting products. We were also encouraged with the slew of ThinkPads that are set to launch later this year — one of which will sport a Thunderbolt port and high-end mobile processor for almost mobile workstation like performance.
