HD VIDEO-CONFERENCING

Bridging physical boundaries

SMBs are going global very fast, and HD video-conferencing solutions can help them connect in a world without boundaries

Business-grade Internet connections, once reserved for Fortune 1000 boardrooms, is now widely available and affordable. The latest adverts in cloud computing can deliver multipoint video to virtually any business desktop worldwide (not just boardrooms). The technology of video-conferencing solves the problem of geographically scattered employees or conducting face-to-face meetings with long distance clients

Why is video-conferencing necessary in modern offices?

Mid-sized companies may be headquartered and conduct business from one or two locations, but business has become more global in nature. Customers, partners, vendors and suppliers can be located in the next state

or on different continents. In addition, finding experienced staff may require interviewing applicants from other locales. Video conferencing is an ideal way to interview potential employees and contractors because it allows you to interact as if you were in the same room regardless of time zone differences. Training and customer support are also two popular applications that have helped to proliferate the use of video conferencing in companies of all sizes. Training can take place from anywhere and at any pre-designated time.

Advantages of video-conferencing solutions

- It eliminates the need for IT to schedule and launch conferences, getting users up and running faster and regardless of where they're located (especially critical for time-sensitive issues);
- It delivers a high-quality conferencing experience, without requiring that end

users understand (or even think about) the underlying technology;

- It enables companies to form project-focused teams comprising co-workers, partners, and even customers;
- It helps managers integrate conferencing into daily business processes, to improve decision making, knowledge sharing, issue resolution and collaboration;
- Its simplicity and fixed cost encourages increased, enterprise-wide use, boosting productivity and driving ROI.

This era of HD video-conferencing solutions which listen to your business concern, provide you with the best solution that suits your unique business needs. The comprehensive suite of video conferencing solutions enables meetings to occur without the need to leave your office – while increasing productivity and reducing costs.

According to statistics, by 2015 about 66 million users will be video enabled; this shows the need for a better option for
