Apple's iPad to return in a new avatar. Check out the latest entrants in the education-centric tablet space

**LG Cookie Smart**

LG may launch a low-end dual-SIM phone soon called the LG Cookie Smart. It has a proprietary OS <http://dgit.in/InpPS4>

✉ I'm a die hard Digit reader and feel proud to be a Digitian! I've been reading this magazine since the past six months and now I feel like reading 2 Digits each month! In the previous issue, I read about "Recovering data"! It was so cool I was simply amazed. After reading the article about using USB drive as key I was simply moved. My friends call me a tech wizard but I'm still afraid because I didn't know about Recuva software. Thank you very much for giving these kinds of software. Expecting a lot in the next edition.

I would like to suggest the following:

- Please provide a Fast Track issue to creating Android apps since Android apps are growing!
- Please give more up-to-date news about Android phones. It could matter to budding Android users a lot.

Koushik B

✉ Thanks a lot for the feedback. Most of our readers are tech gurus in their friend circles and we are glad that there is a new addition. We have provided a Fast Track to Android in March 2011 as well as an Android SDK in May 2011. You can purchase those Fast Tracks from thinkdigit.com/store

Nimish

✉ Well to start with thanks for providing years of sharing knowledge and ideas. I'm not a subscriber though, but always buy your magazine every time I'm near the station. Your stories have always been an inspiration. Just keep on providing tons of information and tricks. Thank you a lot :)

Jowell Mendes

✉ We are glad that you like our articles. Keep reading, and share Digit with more of your friends.

Jayesh

✉ I'm a huge fan of your mag. Keep up the good work. My Class 10 board exams just got over and I'm very happy. The very same day, I rushed to the nearest store and bought

Feedback for the April 2012 issue of Digit

last month's copy (Mom told me not to give way to any 'distractions' during exams). I really liked your column and for once, you got me thinking if really all we surf and post is monitored. I guess we'll never know about that. Last month's Fast Track to Careers in Gaming was a great help to me as I've been planning on taking it up as a career in the future since I read Jayesh bhaiya's article in Dec's SKOAR!

Well that's all, it's just like Digit has become a part of my life and has helped me in all sorts of ways (I'm my relatives' tech consultant and it even helps with girls sometimes :)

Shubham Bhatia

✉ I'm a first time reader of Digit and I've already vowed to buy it every month. I like the way the segments are divided. In the April issue, I liked the comparison of several motherboards and anti-virus suites. The Street Smart section was very refreshing – it gives a guide to buying to tech enthusiasts like us. The software DVDs were fantastic. They were dual-layered, but started in few seconds only! I like the trailers of the coming movies, great HD. I had expected a bit more in the Recover section like how to extract data from damaged HDD but it was compensated by other data. I want to request some things in future editions and some things about the current issue.

- The prices of AV suites that were given were more than what I found in some online shopping stores. I think you have given different scheme prices like some with multi-user price and some with multi-year price.
 - I like you to give details of the UNIX word editor EMACS, like how to use it and how to view encoded messages in this editor. If you've already published it before then please give the links. I also want to know more about minGW and code:Blocks
- Great issue guys.:-)

TURN TO PAGE 2

✉ Hmm using the tech gyaan to impress girls, how the world has changed :) We are glad that you loved the Gaming Careers FT. As for your data being used by big international web-sites, we guess that is the price we have to pay for free services and staying connected to our friends and family. All the best with your 10th results.

Jayesh
