Android goes blue, RCom to give away 3G data with smartphones

Reliance Communications (RCom) and Google India have entered into a two-year agreement under which RCom will be marketing Google's Android OS and mobile services in the country. As part of the agreement, RCom is offering 1GB of 3G data free with Google-endorsed smartphones.

Reliance is also planning to introduce expert customer care, carrier billing, exclusive apps and content in addition to the dedicated Android experience

Android trying its hand at something new

zone at Reliance retail outlets across the country. Reliance's new offer is applicable for all

new and existing pre-paid and post-paid customers, who upgrade and activate their

handsets with Google approved 3G Android devices, on the Reliance 3G network. The 1GB of free data offer is valid from April 15, 2012 to June 15, 2012.

Post consumption of 1GB free data, the customer will need to activate a 3G data plan or will be charged at 10p / 10 kb (pay as you go plan). The offer is only available in RCom's 13 3G circles: Delhi, West Bengal, Mumbai, Himachal Pradesh, Kolkata, Bihar, Orissa, Rajasthan, Assam, Madhya Pradesh, Jammu & Kashmir and North East. **d**

An X and V by HTC

HTC officially launched the HTC One X and One V Android smartphones in India with MOPs of ₹37,899 and ₹18,299, respectively. However, take note that the HTC One S is still expected to arrive in Indian stores only by May.

The HTC One series phones all run on Android 4.0 Ice Cream Sandwich and feature Beats Audio. The One X, V and S have 32GB, 4GB and 16GB, respectively, built-in storage without microSD card expansion slots. Instead, HTC will be offering 25GB worth of Dropbox online storage with the One series, with a 2-year free subscription. Makes sense since most of our data is slowly finding its way on the cloud.

The HTC One X is the company's new flagship device, and measures in at just 9.29 mm in thickness. It runs on a quad-core 1.5GHz Nvidia Tegra

The stylish looking HTC One V

3 processor, and features 1 GB of DDR2 RAM, with Sense 4.0 UI on top of ICS. The impressive 4.7-inch (1280x720 pixel) Super LCD 2 Gorilla Glass display is eye-catching, and comes coupled with an 8MP BSI auto-focus camera with an f/2.0 22mm lens.
