

>>“We needed gesture control and AR features in the app”>>

>>Jitender Verma, CEO, PVR on its app strategy

What are your plans with iOS? Also, how confident are you of BlackBerry?

Our current app supports iOS, and was the first platform for which we released our application. iOS users are a niche target audience for PVR Cinemas. We released our BlackBerry App in April this year. We have not seen a huge penetration on app downloads, but the numbers are still as per our expectations. Our target user for BlackBerry platform is the corporate user.

Is India ready for payment via mobile devices?

No, customers are still reluctant to share credit card details over mobile devices. To overcome this challenge, we have introduced a “Pay Later” option alongside as well, wherein customers who book under the “Pay Later” option, can pickup tickets from the Box office by paying cash.

Why did you opt for a dedicated mobile app, and not an optimised mobile site?

We wanted to exploit native app features such as gesture control and AR, which will be showcased in future releases.

Was this app developed by an in-house team or was this outsourced?

The development was outsourced.

How has the response been for the app? Any negatives?

Positive. We have seen good number of users using our app for ticket purchases. >

>>You’ve been following devworx every month as you enjoy your favourite technology magazine. With your support, devworx has been on a steady rise, and is discovering its identity with you – the reader – the developer. While on one hand, it’s an extension of your most trusted brand – Digit; on the other, it’s tailored for mobile and web application developers in India.

Whether you’re an app development company based out of India, an application developer, or simply an enthusiast – you are nonetheless, a catalyst in India’s growth as a software development powerhouse. Be it the Large Hadron Collider at CERN, or the Curiosity Explorer currently roving across Martian terrain,

Indian technologists and developers are a very close part of cutting edge innovation across the globe. We want to help you innovate!

devworx is an attempt to recognise such stories in software innovation, early on! Irrespective of where you stand in the scenario illustrated, we invite you to be a part of us. Whether you’re an established app development company, a policy maker influencing the mobile ecosystem, or an individual developer, there’s a lot to share with the community. We eagerly want to hear your story. Write to us today! Visit www.devworx.in and go to the Contact us and Careers pages for further information. You can also email us at editor@devworx.in.
