Gigabit Internet anyone?

Google Fiber is a project to build an experimental high-speed - 1000 Mbps internet network in the US. <http://dgit.in/Q4t6t4>

Projector Test

BenQ W710ST

have a VGA or HDMI port for accepting video input; the better, more serious multimedia projectors have two HDMI and VGA ports like the Viewsonic pro8200, BenQ W710ST, Epson EH-TW3600 and EH-TW6000.

Apart from the usual bells and whistles, a few projectors have some unique features. The Dell M110 and Portronics POR 315, for example, come with a microSD and SD card slot on their respective exterior, while

the Casio XJ-M255 is the only mainstream lampless projector in the comparison. Similarly, the BenQ Joybee GP2 has an iPod dock on its top panel, while the Portronics pico projector comes with a cute little adjustable tripod stand. Of the 10 projectors, only the Epson EH-TW6000 and Casio XJ-M255 came with an ethernet port onboard.

Design & Usability

When it comes to aesthetics, they aren't spectacularly different from one projector to the other as far as their looks are concerned, but designs keep evolving. Big or small, projectors are still designed as blocks; but what used to be dark and

dull a few years ago, they have improved in the looks department considerably. In terms of looks alone, there were a few that really caught the eye – the Epson EH-TW6000, with its milky white piano finish exterior and curved edges; the palm-sized Dell M110 which resembles an elegant jewellery box; the Portronics POR 315 pico projector, of course. All the projectors in this test have a plastic exterior, so there isn't much difference between them in terms of build quality. Having said that, the Casio XJ-M255 is probably the best built among the crew – it is considerably compact and less bulky than the others, its stands are nice and sturdy as well.

Govt. Model Engineering College, Cochin

&

LITMUS Systems Consulting Private Limited Infopark, Cochin

Presents

PRIZES WORTH 1 MILLION

in association with IEEE SB

LITMUS excel 2012
inspire | innovate | engineer

September 27 - 29

Excel 2012, the 13th edition of national level techno managerial symposium hosted by Govt. Model Engineering College, Cochin will be held on September 27-29. Be there to witness and experience a plethora of technical and fun competitions, talks by eminent personalities from around the globe, corporate workshops, concert and lots more...

EXCEL 2012 HIGHLIGHTS

technopark
harmony at work
Powering
Innovations for a Better Tomorrow
Technical Project Contest,
1 lakh prize money

LITMUS excel PRO
inspire | innovate | engineer
a package for professionals
