Hai friends.. when i am installing ubuntu in acer note book. its not allowing side by side..its shows restart to continue.

and its not installing in C drive. Now iam using Windows 7 ultimate. How can i install Linux in my note book.

And one more thing friends, as it is not allowing side by side, iam installing in other drives, its shows 100 MB temporary drive, and C drive, and Remaining drives are shows as other drives.. but it doesn't shows specific drive names, How can i install in other drive..

And please help me how to install ubuntu in other separate drive and what are the settings.

insert ubuntu disk, right click and select open folder to view files. in the files see whether u can see a wubi installer..its the best way to install ubuntu along with windows..it allows you to install ubuntu just as any other software and u can uninstall it when required. u can install ubuntu in any drive using wubi but its better to install in any drive other than C..
