

>>hiring mobile app developers continues to be a challenge>>

>>Ashwin Roychoudhary, Founder and CEO, Bombil Media

You got into the web business very early. How was your experience back then?

Web businesses primarily work on advertising or transactions as avenues to make money. Earlier most business on the web worked on creating websites with unique content, gaining traction and monetising by way of ads.

What made you switch to mobile?

Web to mobile was a natural transition. Mobile has always excited me. Also, as a medium, it is extremely powerful and delivers more value than all the previous mass media channels put together.

Do you think it's worth developing apps?

Mobile apps for enterprise is a vast untouched market. There is a lot of opportunity for mobile app developers to develop applications that solve a grave business challenge.

Do you suggest developers/publishers go with a native or cross platform approach?

I recommend a native approach for mission critical high performance apps – especially for enterprises and games. HTML5 or hybrid approach can work for show off apps.

How easy is it to find quality developers?

Hiring mobile app developers continues to be a challenge. The curriculum in engineering colleges is limited to teaching students technologies that are archaic.

How could developers monetise their work?

In India some of the popular ad networks include InMobi, AdMob, Vserv.mobi. >

>>You've been following devworx every month as you enjoy your favourite technology magazine. With your support, devworx has been on a steady rise, and is discovering its identity with you – the reader – the developer. While on one hand, it's an extension of your most trusted brand – Digit; on the other, it's tailored for application developers in India.

Whether you're an app development company based out of India, an application developer, or simply an enthusiast – you are nonetheless, a catalyst in India's growth as a software development powerhouse. Be it the Large Hadron Collider at CERN, or the Curiosity Explorer currently roving across Martian terrain,

Indian technologists and developers are a very close part of cutting edge innovation across the globe. We want to help you innovate!

devworx is an attempt to recognise such stories in software innovation, early on! Irrespective of where you stand in the scenario illustrated, we invite you to be a part of us. Whether you're an established app development company, a policy maker influencing the mobile ecosystem, or an individual developer, there's a lot to share with the community. We eagerly want to hear your story. Write to us today! Visit www.devworx.in and go to the Contact us and Careers pages for further information. You can also email us at editor@devworx.in.
