Pakistan Boycotts COD

Retailers there stopped selling the new COD and MOH titles in the country, claiming they show the country in a poor light

the expandability it offers is great for future upgrades. The handle on top of the Corsair Carbide 400R also helped us to pick the case up and move it around during testing. The second best case in this section was the NZXT Phantom 410. It's curvaceous design and a huge feature list make it easy to recommend if you can shell out it's higher asking price.

Mid-towers above ₹10,001

This category is for people who want to buy higher-end mid-towers but don't want to jump on the full-tower bandwagon. We must say that most of the features you may see in this category are also available on the cabinets seen in the ₹5,001 to ₹10,000 category. It's just that the build quality

of all the cabinets in this section is exceptional.

Cooler Master Silencio 650

This case has a minimalistic and sophisticated design element to it. Apart from being a case from the CM Silent series, it also has numerous features up its sleeves. It has a great looking aluminium door at

the front with a brushed-metal finish. The door also snaps into place using magnets. The orientation for opening the door can be changed too. The top of this case has two sliding covers, one for the ports and the other for air exhaust (this can be closed to decrease sound emanating from the case). The internal foam padding further dampens the sounds generated from within.
