Corsair Graphite 600T

This curvy case from Corsair is bevelled at all of its edges which gives it a very different look. The construction of the case is rigid and the front panel of this enclosure is ventilated by a meshed and dust-filtered grill which can be removed at

the push of a button. A pair of keys is also provided with the case to lock it (a nice feature). Along with the buttons and ports, there is a big dial which acts as a fan controller on the top of the case. The side panels on this case come off easily thanks to latches, making this

case as tool-free as possible. Cable-management is an easy affair thanks to the perfectly located rubber grommets.

Corsair Vengeance C70

This case is designed to look like an ammunition straight out of an armoury. The build quality

of the C70 seems solid and you can carry it around by using two attached spring-loaded handles at the top. The power and reset buttons accentuate it's military design – there's actually a safety flap that you need to flip open to access the reset button. Everything is tool-less inside this
