

Motorola X Phone

If rumours are to be believed, the much awaited Motorola X Phone with Android Key Lime Pie OS is slated to be announced at Google I/O in May this year

Custom Lumia 820 cases

Nokia has announced that it will allow owners of its Lumia 820 smartphone, an option to customise their phone cases or shell covers

Acer Aspire V5-471P

Budget warrior but with chinks in the armour

The Aspire V5-471P is touchscreen based laptop from Acer coming with a 14-inch screen and a Windows 8 Home OS. It houses a comparatively older Intel Core i3-2365M processor which belongs to the Sandy Bridge line up, clocked at 1.4 GHz without any Turbo Boost.

The Acer Aspire V5 has a silver-coloured plastic body all around and lacks the premium feel that one sees in the Aspire S7. The 14-inch touchscreen is a finger-print / smudge magnet which becomes evident while your screen is dark.

We got a score of 1901 on PC Mark 7, which is much lower than competing Core i5 and Core i7 Ivy Bridge processor

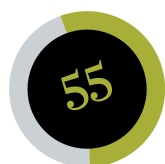

Price
₹39,139

sporting laptops and ultra-books. In the graphics department, 3D Mark O6 gave an overall score of 3230 marks. As far as real life games go, we got around 23 fps on *Resident Evil 5* at 1280x720 pixel resolution. Don't bother with gaming on this machine.

The audio output of the Aspire V5 was quite impressive. Clarity and sound separation were decent for a laptop of this class and we did not notice any distortion at 100 per cent volume level. Videos lack the depth, thanks to the display which is highly reflective and suffers from backlight bleeding around the edges. The battery life just lasted for 140 minutes, which will mean that it will give around 4 - 4.5 hours on standard usage scenario.

The Acer Aspire V5-471P is an ideal machine for those who are looking at an entry-level Windows 8 machine with a touchscreen. Students are the first candidates that come to mind. At ₹39,139 we think it's a tad bit expensive specially considering its older processor. Under ₹35,000 this would make for a good purchase if you can overlook its issues.

Seagate Barracuda XT 3TB

Second to the Velociraptor

Price
₹14,500

This drive comes with the Advanced 4K technology that was missing in the 512-byte sector size in the previous 3 TB iteration. The DiscWizard software allows you to use it on WinXP sporting machines as well. The Barracuda XT 3TB gave faster speeds than the WD Black 2TB drive and is second only to the mighty WD Velociraptor 1TB drive. Sequential Read / Write: 172 / 157 MB/s and Assorted Read / Write: 134 / 144 MB/s. Its cost per GB comes to ₹5.18 which is quite decent for its performance.

Viewsonic TD2220

Touchscreen LED monitors are here

Price
₹19,999

With the Windows 8 OS upon us we will soon be seeing a lot of touchscreen monitors. Viewsonic TD 2220 sports a highly reflective screen and has a fluid touch response. The full HD resolution is impressive and is great for regular use. The contrast ratio using Spyder3Elite colorimeter came to around 451:1 at 50 per cent brightness and contrast settings which is on the lower side. The reflective screen makes movie watching experience in a lit room quite painful. At ₹19,999 it is priced at quite a premium and we would advise you to wait till other players enter this space.
