Mozilla has finally entered mobile phone wars and has unveiled two phones called "Keon" and "Peak" powered by its Firefox OS

New camera lenses

Sony launched two new E-mount lenses for its NEX mirrorless cameras and camcorders

Huawei Mediapad 7 Lite

A tablet good for multimedia but very laggy for everything else!

Price
₹13,700

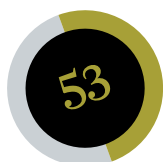

The Huawei MediaPad 7 Lite has a unibody design giving it a very good build. It weighs 370 gm, which is on the higher side considering the competition, but it isn't a hindrance with the utility. The Huawei Mediapad 7 Lite runs Android 4.0 ICS which is a disappointing as we have seen tablets launch in India running

Jelly Bean out of the box. The battery life of the device is average. It lasted for a little over 3.5 hours in our continuous video playback test. The overall performance of the tablet is quite sluggish. It takes a couple of seconds to switch the screen orientations and load the home screen when exiting an app and that is a very bad thing.

The tablet can run basic games well but if you try to play *Dead Trigger*, you will inevitably pull your hair out. The audio from the tablet is very good. The device supports a 3G SIM card not only for data but for voice calls as well.

The Huawei Mediapad 7 Lite is a disappointing tablet. The good thing about it is that it is extremely well built, the display is good for watching videos and the audio output from the speaker is loud and clear. The downside is that it is very laggy and you will be in for a frustrating experience if you run heavy apps and try to multitask. It's hard to recommend the Huawei Mediapad 7 Lite since the competition offers a better deal.

JBL SoundFly BT

Very good sound, but not truly portable

Price
₹9,990

The SoundFly BT is a fairly compact Bluetooth speaker. Retains similar dimensions to the Jabra Solemate, but has a more curved design. The integrated two-pin plug lets you directly plug this into the wall. Audio quality is surprisingly good. Volume levels are enough to successfully fill up a mid-sized room. The clarity of the vocals, even at volume around 70 per cent is impressive. Range for Bluetooth connectivity is around 10 metres, with one wall in the way, which is good. The Jabra SoleMate offers battery backup as well at the same price, making it truly portable and it has a good sound quality too.

Sennheiser Momentum

All round brilliance

Price
₹24,900

The Momentum is a light, compact, circum-aural headphone. The whole ear is covered comfortably and the cups settle snugly, with a very high quality leather finish. The Momentum is perfectly walking the path between being bass or treble heavy. The bass was adequately powerful when it needed to be, while the higher end of the spectrum gets the necessary focus for crystal clear vocals. Important is the clear distinction between various parts of the sound spectrum. The Momentum can handle most music genres with ease. Brilliant, but they do cost a lot of money.
