

Sansui releases budget phones

Sansui Moblies launched two new budget friendly but feature rich phones namely the S23 and S30 with powerful batteries available for ₹1,100 and ₹1,290 respectively

New Micromax Canvas

Micromax will release a new smartphone from its stables called the A116 Canvas HD and it will be available for ₹15,000 from mid-February

ZOTAC ZBOX ADO6 Plus

Brazos 2.0 on the ZBOX

The ZOTAC ZBOX has become synonymous with mini-PCs in this part of the world thanks to their constant refreshes. The ADO6 Plus houses an AMD E2-1800 dual-core APU which has integrated HD 7340 graphics, there is 2 GB of DDR3 RAM and a 320 GB hard drive. It comes without any OS pre-installed.

On the design front there are no surprises for anyone familiar with a ZBOX. The glossy black box housing all the components is still the finger-print magnet but we love the connectivity options on board which include an SD card slot and two USB 3.0 ports. It supports WiFi and bluetooth and comes with a Wi-Fi antenna.

We installed Windows 7 Ultimate 64-bit OS and ran our

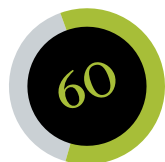

Price
₹20,999

standard set of benchmarks. It performed better than the AMD E350 sporting ZBOX ADO3 Plus and AMD E450 sporting ADO4 Plus. It was much better in terms of graphics when compared with the Intel Atom D2700 sporting ID80 Plus as well. Cinebench R10 gave a score of 2372 whereas PC Mark Vantage gave 2624 which was higher than all three ZBOXes mentioned previously. HD movie playback suffers if the 1080p clips have a data rate higher than 8000 kbps. The CPU utilization is over 80 percent while playing full HD videos which is not great. *Resident Evil 5* gave 19 frames per second at 1280x1024 resolution on low settings, so it is clearly not meant for gaming.

The price of ₹20,999 is lower compared to its contemporaries when they launched, but we would much rather have a pre-installed OS at this price point. The non-plus variant (without the HDD) comes at ₹15,999. It is ideal to be used as an HTPC, thanks to a bundled in Windows Media Centre remote, as well as for regular surfing and office work, but not for gaming.

Harman Kardon CL

Comfort and elegance

Price
₹9,990

Everything about this pair of headphones oozes out understated class – the packaging, the pleather carrying case, and finally the square matte black housing with steel trim – all just visual delight. Put them on and you're transported into a world of exceptional detail. The sound signature is on the brighter side, and the highs are very well defined. The bass will surprise you – distinct and hard hitting. Perhaps only the soundstaging was lacking but now we're just nitpicking. Not even the Grado SR 225 was as comfy. As for features you've got on-wire controller, microphone, detachable cable and exchangeable metal headband. All of it justifies the high price point.

JBL J22i

Meaty beats for all the bass lovers out there

Price
₹2,990

The JBL J22i is a bass-head's delight, so right at the outset we'd like to ask you to look elsewhere if you're looking a neutral pair of in-ears. But before we get into the audio performance let's look at the build. The housing seems to be sturdy while the flat cable (which has a mic and control buttons) is even sturdier. The added benefit is that it remains tangle free. In terms of performance the J22i is good in the lower frequencies but upper mids and extreme highs get muddled when instrument density increases. But apart from that a solid set for the price point.
