

Mobile Phones - National

In order to keep comparisons fair, this category had brands that are prospering in India, but are not really global powerhouses such as Samsung, Nokia, Sony and the likes.

Last year we had surveyed everyone for mobile phones in general, without breaking it into two categories, however, this year that would have resulted in a list of brands way too long for anyone to be really objective when answering the long survey. Of these "national" brands, last year, Micromax stood in ninth place, and first

amongst the smaller brands. The order for the top six was: Micromax, Spice, Karbonn, Videocon, iBall and Lava. This year, Micromax still took top slot, but Karbonn leapfrogged Spice into second place. Sadly, apart from Micromax and Karbonn, none of the other 22 brands in the running were able to post a positive score. This happens when more people disagree, or strongly disagree than those who agree or strongly agree on the questions we ask.

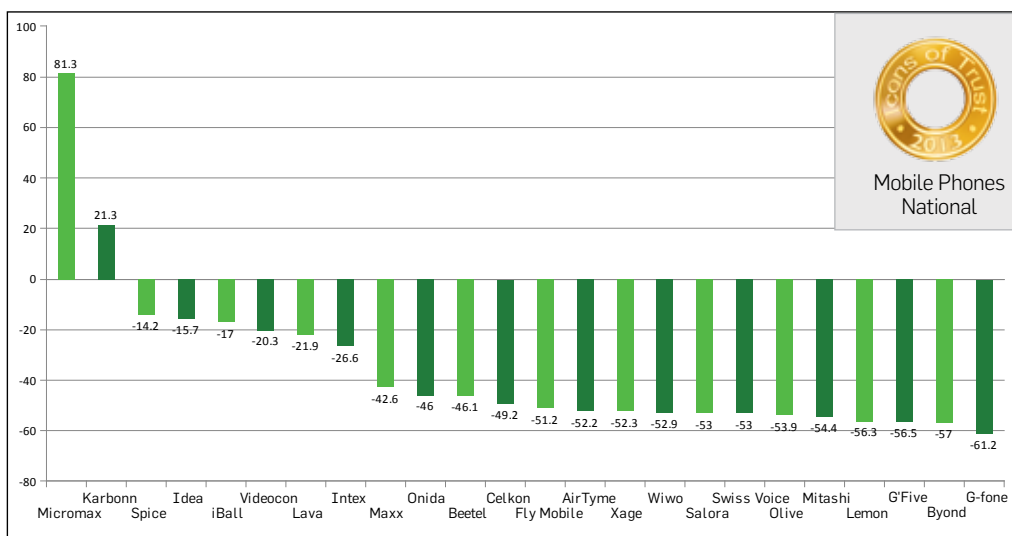

Overall, this shows a lack of blind trust for most of these brands, and it is something they

will have to work on to raise confidence amongst technology enthusiasts such as yourself.

We should also explain that we don't score negatively for people who have no opinion about a brand. So when a brand gets negative marks, it's because people either "Strongly disagree" or "Somewhat disagree" with statements such as "The following brands make high-quality, reliable products in this category." Apart from the brands that placed in the top four of five slots in this survey, most people had no opinion about most of the others. It

Interesting Facts

- **91%** people first think Micromax when thinking of mobiles of this category!
- **75%** people think Micromax makes stylish products
- Only Micromax and Karbonn got overall positive scores for after-sales services
- Only 4 brands got positive scores for availability - Micromax, Karbonn, Lava and Spice
- Micromax is the only brand the survey takers would recommend to friends

was common in this category for a lot of brands to get over 80 percent "No opinion" answers to questions. This obviously shows a lack of exposure to products from these brands. Thankfully, with more and more brands offering cheap Android phones, we hope this will improve next year.
