

Internal hard drives

Although laptops and mobiles may be outselling desktop PCs these days, the most often upgraded component of a desktop remains the hard drive. With people running out of space all the time, there's really no surprise that this is the most

Interesting Facts

- **57.5%** of people own Seagate drives
- **92%** of people think WD's drives are reliable (**90.6%** for Seagate)
- WD beats seagate in terms of after-sales services, but Seagate has more service centres
- **94.5%** of people say they'll buy a WD HDD next (**89.1%** Seagate)
- **93.3%** of people would recommend Seagate to friends (**90.4%** WD)
- **54%** of people have never heard of Verbatim

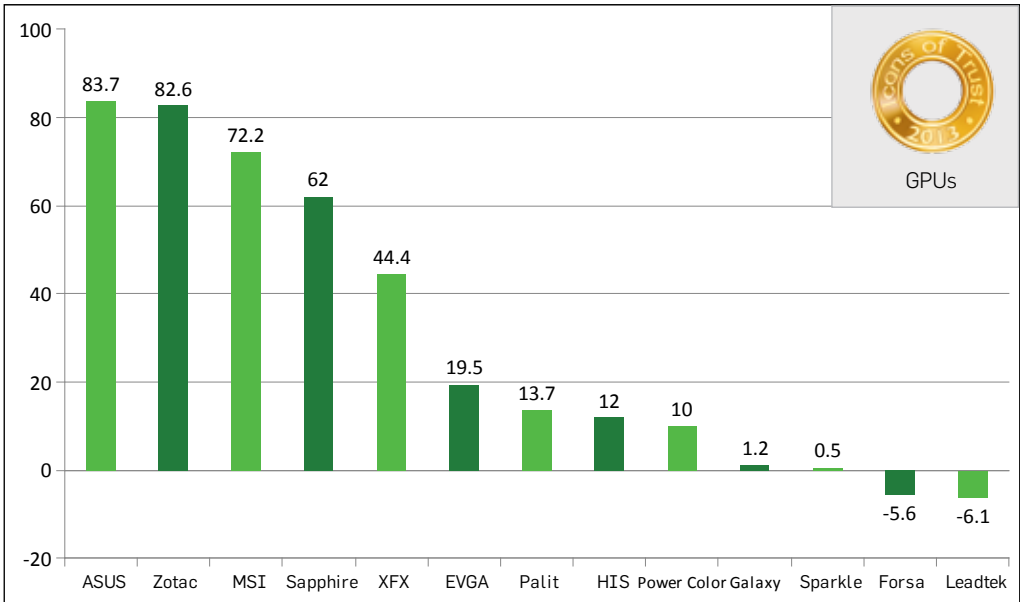

popular component category this year. In the end, this category boils down to Seagate and Western Digital fighting it out to be the most trusted brand. Although the order is pretty much the same as last year, with Seagate coming out on top, the gap between it and Western Digital has come down a lot.

We need to report here that we didn't consider those who said they owned Hitachi drives as scores for WD - because although WD bought Hitachi in 2011, we have no way of knowing if those drives were bought before then. Also, we've done the math, and WD's overall trust score jumps to 86.5, which still keeps it in second place.

Graphics cards

Although GPUs are usually considered to be an AMD vs NVIDIA battle, it's the brands that manufacture the cards that we're interested in here. However, that still didn't stop quite a few respondents putting down NVIDIA or AMD as the first brand name

they think of in terms of this category. ASUS won again this year, coming out on top in a really crowded market. However while last year they

Interesting Facts

- Most people (**20.7%**) own MSI cards
- **69.4%** people feel that Zotac offers the best after-sales service
- **83.2%** people feel they will buy a Zotac card next

were 18 points ahead of second placed MSI, this year Zotac has leapfrogged MSI into second spot and lost out to ASUS by a mere point. The battle for being called most trusted GPU brand is heating up between the top two, and both MSI and XFX have fallen a place - Sapphire taking last year's fourth spot away from XFX.
