

BLACKBERRY 10

RE-DESIGNED, RE-ENGINEERED, AND RE-INVENTED

BlackBerry is proud to present the all new BlackBerry® Z10 smartphone. The BlackBerry Z10 (all touch) is the first smartphone powered by BlackBerry® 10, the re-designed, re-engineered, and re-invented BlackBerry platform that creates a new and unique mobile computing experience.

BlackBerry Z10 smartphone is elegant and distinctive, and the fastest, most advanced BlackBerry smartphone yet. It features a 1.5 Ghz dual core processor with 2GB of RAM, 16GB of internal storage, and an expandable memory card slot that supports up to 64GB cards.

The smartphone also includes the latest enhancements in high density pixel and screen technology to display clear, sharp, and incredibly vivid images. It features a micro HDMI out port for presentations, and advanced sensors such NFC (near field communications) to support mobile payments and the exchange of information with a tap of the smartphone.

HIGHLIGHTS OF BLACKBERRY 10

BlackBerry 10 is a robust and reliable platform that is smooth and responsive. It has a modern design and a gesture-based interface that is highly discoverable. It is designed to support, learn, and adapt to the way you work and share with features like:

- The ever present BlackBerry® Hub, which is a single place to manage all your conversations whether personal or work email, BBM™ messages, social media updates or notifications, and the ability to “peek” into the BlackBerry Hub from anywhere, so you’re always only one swipe away from what matters to you.
- BlackBerry® Flow, which allows features and apps to flow seamlessly together, helping you complete the task at hand effortlessly and efficiently. For example, you can tap on an attendee listed for a meeting to see their latest tweet or LinkedIn profile.
- A keyboard that learns what words you use and how you use them, then offers them up to you so you can type faster and more accurately.
- BBM (BlackBerry® Messenger), which allows you to share things in an instant. BBM in BlackBerry 10 includes voice calling and video chat, and introduces the ability to share your screen with another BlackBerry 10 contact.

- BlackBerry® Balance™ technology, which elegantly separates and secures work applications and data from personal content on BlackBerry devices.

- Time Shift, an astonishing camera feature that lets you capture a group shot where everyone is smiling with their eyes wide open. Story Maker, which lets you bring a collection of photos and videos together, along with music and effects, to produce an HD movie that you can instantly share.

- The new BlackBerry 10 browser, which sets the industry benchmark for HTML5 support on smartphones, is incredibly fast. Scrolling or zooming is fluid and it supports multiple tabs and private browsing.

- BlackBerry® Remember, which combines memos, tasks and much more into a single experience. It helps you organize and manage information you have on your smartphone around projects or ideas, letting you collect content such as websites, emails, photos, documents, and other files, and then like a To-Do list, lets you create tasks, assign due dates, and track your progress. If your BlackBerry 10 smartphone is set up with a work account, your Microsoft® Outlook® Tasks will automatically be wirelessly synced with BlackBerry Remember. If you have configured an Evernote account with your smartphone, BlackBerry Remember will sync Evernote workbooks as well.

- The BlackBerry® World™ storefront, which now includes 70,000 BlackBerry 10 apps and one of the most robust music and video catalogs in mobile today – with most movies coming to the store the same day they are released on DVD. In addition, Facebook, Twitter, LinkedIn and Foursquare apps for BlackBerry 10 are preinstalled, and BlackBerry 10 customers will have access to leading applications from across the globe. Leading application providers including Disney, Cisco, Foursquare, Skype and Rovio have committed to the platform. If you are a developer, developing an app for BlackBerry 10 is easy. Everything you need to build visually compelling and astonishing apps is available from BlackBerry for free. BlackBerry 10 is an open platform that provides a variety of development languages and runtimes designed to fit developer's skills. There are four different development approaches supported: Native (C, C++, QML etc), Web using HTML5, Android Runtime and Adobe AIR. ■

EXCLUSIVE FOR MOBILE APPLICATION DEVELOPERS!

Now you can try your hand at developing for the new BlackBerry 10 platform! Simply load the tools within the Omega DVD that came with this edition of Digit, and you can start working on your applications now! Check out www.developer.blackberry.com or scan the QR Code alongside for more help and articles on BlackBerry development! For those with no development background, you too can develop applications on BlackBerry

10! BlackBerry App Generator allows for development of apps for BlackBerry 10 in less than 10 minutes. The apps are built using RSS feeds from blogs, YouTube, Facebook, Wordpress, etc. BlackBerry 10 apps can also be built using multi-platform toolsets such as Unity, PhoneGap Marmalade, Appcelerator, and others. Check out www.blackberryappgenerator.com or scan the QR Code alongside for more details!
