

## Another World on BB10

The 20th anniversary edition of Eric Chahi's Another World is now available for BB10 devices. It's priced at US \$5

## Oct launch for Ubuntu phone

Canonical's CEO announced recently that the first smartphone running on Ubuntu mobile OS will release around October this year

### Features and performance

The first flaw with the HTC One V is that it has a mere 1GB of built-in storage accessible by the user. The camera on the device too is a tad disappointing considering the price you pay. On the bright side, the display on the device is quite crisp and

clear even when using it outdoors. The battery on the device is a slight disappointment. The Sense UI overlaying Android is one of the better-preloaded skins available in the market. The interface of the device is smooth but it does show its age when you try to run heavy apps or use it for multitasking.

The HTC Desire X has the same skin as the One V. The One V may have a better display and a better camera, but the power under the hood of the Desire X is way better. More RAM and a dual-core processor make this device better if you want to use it for multitasking and playing games. Users also get 25GB free

Dropbox storage along with the 4GB built-in storage giving you ample space. The black levels of the display are deep and watching multimedia content was good for both audio and video. The display on the LG Optimus L9 is very vibrant and the viewing angles are excellent. Consuming multimedia content
