

Chromebook Pixel launched

Google finally launched the Chromebook Pixel for \$1,299. Its 12.85-in touchscreen has a resolution of 2560×1700

Apple patent reveals iWatch

Rumours about Apple working on a flexible smartwatch seem to be true, according to a recent patent filed by the Cupertino firm

Smartphones Test

life of the HTC 8S, too, is good enough to sustain for more than a day.

Winners

The Micromax A116 Canvas HD wins the Best Performance crown. Under ₹15,000 you get a quad-core processor, 1GB of RAM and Android 4.1 upgradable to 4.2. The build of the device too is good and it boasts of dual-SIM capabilities. The interface is smooth and 5-inch 720p display is very vibrant. The device is plagued with random bugs and crashes, but what you get is a fantastic overall package of beauty and power for an incredible price. It also comes with a slew of local content under the Micromax

Android 4.5h

MStore banner such as Bollywood content, news and more. Of all the phones, the A116 offers the best of both worlds – design and performance. Our Best Buy award goes to the Micromax Canvas 2 A110. Not only is it a good-looking phone (apart from the plasticky back) but it is a very good performer as well. It has power under the hood to run apps, a good display and a very comfortable user experience. The UI may be a bit cartoonish for some but there are a plethora of free skins available on the Play store to rectify this. It also offers quite a bit of local news and entertainment content. Despite being big, the device is quite comfortable when held up against one's ear for making

calls. It is ideal for those who want a large screen device as their first budget smartphone. **The Editor's Pick** goes to the HTC Desire SV. If a premium dual-SIM phone is what you are looking for, then this is the device for you. In the benchmark scores, it performed quite well. The build may not be beautiful but it is sturdy enough to sustain a few drops. The Sense UI is one of the better-preloaded skins available in the market. It is capable of handling all the apps from the app store and the free 25GB of Dropbox storage is a welcome freebie. The only downside is that if you use the device a lot throughout the day, you may want to keep a charger at hand. **d**
