Acer Iconia W510

Impressive long-lasting convertible with some nagging issues

The Iconia W510 is the first Windows 8 Pro sporting convertible we have seen from Acer. The tablet fits snug in the keyboard dock which has a raised white-coloured plastic housing for the tablet. The hinge is capable of rotating full 270 degrees allowing the dock to act as a stand for the tablet. The keyboard dock which also houses a battery when clubbed with the tablet, makes the convertible quite heavy at 1.26 kg. The keyboard is a bit cramped.

It houses an Intel Atom Z2760 processor with just a 64GB SSD of which only 46GB is available to the user. The trackpad with a single button is not very responsive and requires a hard press on

Price
₹42,990

the buttons. Trackpad lacks Windows 8 gestures.

Acer Iconia W510 has a clear and loud audio. Distortion was hardly noticed in any audio clip we listened to, even at full volume. The 1366x768 resolution is quite good for the 10-inch screen and thanks to the IPS panel, the tablet has brilliant viewing angles. The W510 is great for playing tablet based games and although technically you can install PC games, the Intel GMA graphics isn't powerful enough for full fledged games. One thing that bothered us was the significant heating up of the right hand side of the tablet.

The W510 is priced at ₹42,990. For business users who are looking at a device for work and to consume media, this makes perfect sense. For those looking purely at tablets, there are better alternatives. We would advise prospective buyers to wait for our full review of the HP Envy x2 before purchasing the W510.

JBL Flip

The pipe bomb

Price
₹5,990

The JBL Flip is certainly not a unique gadget. But in its category – the small form factor portable speaker domain – it is the best. The black barrel shaped speaker is deceptively loud, and we mean deceptively loud. It totally smokes the competition in terms of sonic performance and volume. (Yes we mean you, Logitech Mini Boombox). The build quality is solid and the device looks good. Our only complaint is with stability. The shape makes it easy to roll off the table if you've not kept it firmly on its feet. As for features Bluetooth range is as promised and the microphone is of standard quality. All of this at a price point of ₹1,000 lower than the Logitech Mini Boombox. If you're in the market for an ultra portable Bluetooth speaker, this is it.

iDance EB-X203

Decent performer, wrong price point

Price
₹2,199

These pair of in-ears from iDance aren't much to look at, but performance-wise they aren't bad either. Surprisingly it held its own against the Cowon EM1, Meelectronics M6, the Philips SHE 9750 and the Tekfusion Twinwoofers. The lows distort ever so slightly, but the upper mids are nice and open, giving the perception of "clarity". The overall sound signature is bright. The woven cable is tangle free and the mic works well. At ₹2,199 the pricing is slightly high. If you aren't looking for a mic and can stand the amped up bass, the Tekfusion is a cheaper option worth considering at ₹1,550.
