

Hungama launches music app

Hungama launched a music application in the previous month - "Hungama - Free Bollywood Music". This app is available on the Google Play Store. <http://dgigit.in/Zf1PVE>

Logitech G-series

Logitech has announced a new lineup for its G series of Gaming peripherals with the launch of new mice.

ASRock FM2A85X-ITX

Impressive board but at a ridiculous price point

This is the first FM2 socket-based board in the mini-ITX form factor that we had a chance to test. The Windows 8-ready ASRock FM2A85X-ITX board looks really dense thanks to the layout, with a socket surrounded by two DIMM slots below, a PCIe x16 slot up top and the left side covered with seven SATA 6 Gbps ports. Heat-sinks are nothing great thanks to the form factor. We liked the placement of the SATA ports as none of them will get blocked if you put on a graphics card, an issue we had seen in some mini ITX boards in the past.

The ASRock FM2A85X-ITX offers an impressive looking UEFI BIOS and you also get the 'Restart to UEFI' function which allows you to set the

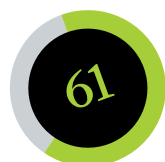

Price
₹13,999

reset button to lead you to the UEFI BIOS. It has a dehumidifier function which when enabled under the H/W monitor in the BIOS, spins your system's fans to get rid of any moisture accumulated (if your system is not used for a long time).

We tested the board with AMD A10-5800K and 8 GB Kingston HyperX RAM without any graphics card. Cinebench R11.5 gave a multi-core score of 3.33 and an OpenGL score of 32.11 which was in line with other higher end A85 boards we have tested in the past. Gaming using the integrated HD 7660D was quite impressive giving 40 FPS in *STALKER: Call of Pripyat* at 1280x1024, medium settings with tessellation enabled. We could overclock to 4.1GHz which wasn't as impressive as the ASUS or Gigabyte A85 boards, but good enough for this form factor.

The pricing is what is really surprising because at ₹13,999 it is almost ₹4,000 more than ATX form-factor ASUS F2A85 V PRO which is quite a jump.

Circle Sniper

Cheap and ergonomic

Price
₹2,499

The Circle Sniper is a very unusual looking mouse, a member of a breed of so-called "vertical mice" that are supposed to be ergonomic masterpieces and will save your wrist from the perils of Carpal Tunnel. We have no complaints at all with the mouse other than the fact that the design takes some getting used to. Tracking is precise and even though the dpi range is low and you can only switch between 3 options, it's sufficient for the average person. To those who are worried about the shape, the mouse feels very natural in your hand but the seemingly awkward design is what will take getting used to. We found the palm rest to be more hindering than helpful, but that may just be because of the way we hold it. Adecent mouse.

HP DeskJet Ink Advantage 6525

Web-connected AIO with very good print quality

Price
₹13,399

The HP DeskJet Ink Advantage 6525 is a good improvement over the HP 5525 and offers a boatload of features including ePrint and wireless printing. Auto-duplex mode is a quite a good feature. Now while the printer comes for around ₹13,399, its cartridges are priced at an economical ₹300 per cartridge. This ensures that your cost of ownership is under check. The HP 6525 is an ideal all-in-one for home and SoHo setup where the print volumes wouldn't be very high but high quality printing is a must.
