Dropbox, the popular online storage service bought out startup, Mailbox in a recent acquisition. More here: <http://dgit.in/14boDOc>

Xbox Live accounts hacked

In a statement by Microsoft, the company confirmed that high-profile employee Xbox live accounts were compromised in a security breach <http://dgit.in/14758Gc>

talking shoe do? Unfortunately, it doesn't issue warnings telling its wearer to avoid dog poop and other roadside hazards. Instead, Google's latest toy "aims to translate movement data [into] witty messages to users and their friends."

In a Google video promo the sharp-tongued shoe mutters, "This is boring" when its wearer is loafing on a park bench but perks up when he breaks into a trot, enthusing, "I love the feeling of wind in my laces." The gamesmanship starts in earnest when a Google talking shoe owner steps onto the basketball court and starts raining jumpers— "Call 911, because you're on fire." the soliloquizing sneaker declares.

Apparently, these pronouncements also appear on a user's Google+ page, or at least they're presented in that format in Google's promo video. The bad news—don't expect to order up a pair of these pontificating clogs any time soon. They're just a concept developed for interactive arts collective 'Yes Yes No' via Google's 'Arts Copy Code' project.

Samsung HomeSync outed

Apple TV has finally started branching out to various parts of the world, in a bid to make

expansion by Apple slide by. In an announcement at MWC 2013, Samsung unveiled a new HomeSync media set-top box, to compete with Apple TV.

The new media streamer is said to run Android 4.1 Jelly Bean, and packs some impressive hardware. For starters, there's a 1.7GHz dual-core processor along with 1GB of RAM to ensure no performance bottleneck. And to make the deal sweeter, there's also a 1TB hard drive built in to appease media hoarders. The Samsung HomeSync box will also support running of all Android apps, meaning, you can play all those popular games on your big screen in full 1080p HD. We're sure Samsung will be coming up with some sort of a touch or motion controller.

Currently, there's no word on the availability or the price of this new media streamer, but be rest assured, when it does release, it will be competitively priced with respect to the Apple TV.

Lenovo's new budget Jelly Bean tablets

At MWC 2013, Lenovo announced three budget tablets: the 7-inch A1000, the 7-inch A3000 and the 10.1-

The Jelly Bean tablets will be available in the 2nd half of 2013

have been unveiled, but the company says the tablets will be priced very aggressively. All the tablets will run on Android 4.1 Jelly Bean, and are expected to be IdeaTab branded. Two of the tablets are quad-core (S6000 and A3000), while the last (A1000) is dual-core.

If Lenovo is targeting the budget tablet consumer with the launch of these tablets, it isn't the first. We've seen Acer launch the Iconia B1 recently in India. For more details about Lenovo's new budget tablets, visit: <http://dgit.in/YsOvOn>

Nikon D7100 launched in India at ₹80k

Nikon announced its latest DSLR, the DX-format D7100 for the Indian market in March. The D7100 sports a completely new 24.1MP APS-C CMOS sensor, 51 AF points with 15 having cross-type focus and EXPEED 3 image processor. The sensor on the D7100

doesn't have the optical low pass filter (OLPF) which is generally used to minimise moiré effect or scenes with repeating patterns. But this comes

Nikon D7100 launched

at the cost of image sharpness. According to Nikon, the absence of OLPF in the D7100 will improve image sharpness.

The camera comes at a price point of ₹79,450 (body only). Add in an AF-S Nikkor 18-105mm f/3.5-5.6G ED VR kit lens and the price goes up to ₹94,950. If you want the wide-angle AF-s Nikkor 16-85mm f/3.5-5.6G ED VR kit lens, the camera will set you back by ₹1,12,950. Visit <http://dgit.in/XRHRkg> for more details.

Samsung HomeSync

Apple products a part of living rooms across the world, but it looks like Samsung won't let this

inch S6000. All the three tablets will be available starting Q2 2013. No pricing details
