Google's war against account hackers, Twitter's anti-phishing practices, and alleged hacking of DRDO

Galaxy S4 blows benchmarks

A report containing benchmark scores shows that the Samsung Galaxy S4 smokes every other current phone. <http://dgit.in/WDcMnc>

The Xperia ZL looks kinda different than the Xperia Z; it's slightly more compact but also a bit thicker. The Xperia ZL also has a rubberized back whereas the Xperia Z has a glass back. The Xperia ZL isn't IP57 certified but it does cost about ₹3,000 less too.

Besides launching these two beauties, Sony announced two more Android 4.1 Jelly Bean phones on March 18: the Xperia SP and Xperia L, without any pricing or availability details. The Xperia SP will feature a 4.6-inch 720p display powered by the Bravia 2 engine. The phone will run on a dual-core Snapdragon Krait CPU clocked at 1.7GHz while an Adreno 320 GPU will take up the graphic duties. The Xperia L is a slightly smaller version of the Xperia SP,

Sony Xperia L

featuring a 4.3-inch screen with an 854x480 pixel resolution. It also has a slightly slower 1GHz dual-core Qualcomm MSM8230 Snapdragon processor with no word on the RAM. More details on both the devices here: <http://dgit.in/14380E1>.

Nokia Lumia 720 & 520 arrive

Nokia augments Lumia line-up

Nokia shifted its focus to the mid-range and budget smartphone segment with the reveal of two Windows Phone Lumia handsets, 720 and 520, at the end of February at the Mobile World Congress.

The Nokia Lumia 720 sports a 4.3-inch screen with its ClearBlack technology and a resolution of 800x480 pixels. The Lumia 720 is powered by a dual-core 1GHz Snapdragon processor and 512MB of RAM. Imaging is taken care of by a 6.7MP camera. The Lumia 720 has an all-plastic body, is about 9mm thick and weighs 128 grams. The Lumia 720 is expected to be sold at around \$330 (approx. ₹17,850).

The Nokia Lumia 520 has a 4-inch IPS display with a resolution of 800x480 pixels. It shoots pictures using a 5MP camera that can also record videos at 720p HD. The Lumia 520 runs on the same 1GHz processor that powers the Lumia 720 and also has 512MB of RAM. The Lumia 520 will probably be launched in the first half of 2013 for \$183 (approx. ₹9,900). Nokia has already listed

the phone as 'coming soon' on its India site. For more details about the Lumia 720 and 520, point your browser here: <http://dgit.in/WAFpla>.

Nokia's other budget Windows Phone 8 device, the Lumia 620 is now available in India for ₹14,999. The Lumia 620 is powered by a 1GHz dual-core Snapdragon S4 processor and 512MB of RAM. It features a 3.8-inch 800x480 pixel ClearBlack display. Users also get 7GB of SkyDrive cloud storage with the smartphone. More details on the Lumia 620 can be found here: <http://dgit.in/XgInOu>

First Mozilla Firefox OS phones announced

Mozilla revealed two handsets running Firefox OS and announced partnerships with 18 telecom operators around the world at the Mobile World Congress (MWC) in Barcelona. The handsets – the Open and the One Touch Fire will be manufactured by ZTE and Alcatel respectively and will be launched for European, Latin American and Asian markets. Both handsets are primarily aimed at the budget smartphone

ZTE handset sporting the Firefox OS

market and their specs confirm that. Sony, LG, and Huawei have also confirmed they will be making Firefox OS phones. The Firefox OS phones will be first launched in Brazil, Colombia, Hungary, Mexico, Montenegro, Poland, Serbia, Spain and Venezuela followed by other markets.

The big deal about Mozilla's MWC reveal was its partnership with 18 telecom operators, most of which have large market shares in their respective countries. Refer to <http://dgit.in/WAEUYn> for more details.

Samsung shuts down bada, demos Tizen

The Korean giant aims to allocate resources from bada to Tizen, whilst helping developers with the transition. Samsung also revealed a reference design running the Tizen OS on an Intel chipset at MWC 2013.

The first devices running the Tizen OS are expected to hit store shelves as early as July 2013. Apart from Samsung and Intel, who are at the forefront of the development of the OS, NTT Docomo has committed itself as a carrier for the Tizen-based OS device in Japan. Refer to <http://dgit.in/WAEAZv> for more details.

LG Optimus G officially launched

LG officially launched the Optimus G in India with an MOP of ₹30,990. This price and the hardware that powers the Optimus G makes it clear that LG is targeting the Samsung Galaxy S3. Refer to <http://dgit.in/WAELnA> for more details. The Korean giant also unveiled new phones at MWC 2013, specifically the Optimus F5 and F7 (<http://dgit.in/WAGKIu>), as well as the new L Series II devices (<http://dgit.in/WAGJo3>), which offer dual-SIM capabilities.
