

Lego Histogram coffee-table

Nucleo pays tribute to Legos in the form of a coffee-table made of legos. More details of this can be found at <http://dgit.in/LegoCfT>

Motorcycle armour

Designers, Franco Pessino and Damian Segura have created armour for bikers. <http://dgit.in/YLTk4z>

fact that the Z500 is very well built, and it ties with the much more expensive Sony VAIO T in the build quality ratings.

HP, for all the amazing work it has done with the Envy dv6 range (formerly known as the Pavilion dv6), has left out the same oomph from the Envy m6. While it's built very well, instead of the classy brushed

metal look of the dv6, the m6 has a shiny look.

The HP G6-2236tx and the Dell Inspiron 15R in this price bracket manages to score a satisfactory enough number in the build quality ratings to be in consideration. But, we must say that both sets of designers have possibly taken inspiration from the boffins at Porsche! These

laptops would be appreciated in the lower price bands, but at this point, the exact same looks and thickness is less appreciated.

Category 4: ₹60,000 - ₹70,000

Both Sony VAIO notebooks, the S-series and the T-series, score very well when it comes to build quality. The VAIO S, at first

glance, doesn't betray anything new or special. Sony has reinforced the lid with carbon fibre, keeping it as slim as possible, but making it strong enough to prevent damage. The VAIO T has a similar design to the T-11 ultrabook, and the grey and chrome look good. Both VAIO machines have a matte finish, in different colours.
