

There are several Linux VPN solutions available:

- `vpnd`. See the <http://sunsite.dk/vpnd/>.
- Free S/Wan, available at <http://www.xs4all.nl/~freeswan/>
- `ssh` can be used to construct a VPN. See the VPN mini-howto for more information.
- `vps` (virtual private server) at <http://www.strongcrypto.com>.
- `yawipin` at <http://yavipin.sourceforge.net>
