Virus Bulletin

www.virusbtn.com

Virus Bulletin started in 1989 as a magazine dedicated to providing PC users with a regular source of intelligence about computer viruses, their prevention, detection and removal, and how to recover programs and data following an attack.

Editorial independence has always been Virus Bulletin's prime concern. From the very first issue, Virus Bulletin has cut through antivirus hype and remained uninfluenced by sales pitches and marketing babble. The aim of the magazine is to arm users with all the information they need to stay current with the latest developments in the antivirus field.

Welcome to Virus Bulletin

Since 1989, Virus Bulletin has been dedicated to providing PC users with a regular source of confidential, unbiased, independent intelligence about computer viruses, their prevention, detection and removal, and how to recover programs and data following an attack.

The aim of the magazine and website is to arm users with all the information they need to stay current with the latest developments in the anti-virus field.

In the monthly magazine

Keep up to date and in the know with a VB magazine subscription. Month by month, Virus Bulletin provides:

- Thought-provoking news and opinions from respected members of the AV industry
- Detailed analysis of the latest virus threats
- Feature-length articles exploring new developments in the fight against viruses
- Interviews with leading anti-virus experts
- Independent in-depth evaluations of current AV products
- Easy-to-read comparative reviews featuring the unique VB 100% award scheme
- VB Team Supplement - a monthly magazine supplement covering spam and anti-spam techniques

Spam Supplement

The VB Spam Supplement presents a selection of spam related news and articles on spam and anti-spam techniques - some technical, some ethical, some relating to real-world experiences of dealing with spam.

VB Conference

The VB conference provides a focus for the AV industry, representing an opportunity for experts in the anti-virus arena to share their research interests, discuss methods and technologies and set new standards, as well as meet with - and learn from - those who purport technologies into practice in the real world.

Featured articles

Plenty of phish in the news
The number of phishing attacks, and the associated costs are increasing. One town that won't let you down...

VB100% can smoothly sail a hurricane, infectious disease, customs delay or terrorist attack in sight, with record damage numbers and was described by a number of delegates as the best Virus Bulletin conference they had attended.

Anti-virus spamming and the virus naming mess: part 1
FBI/DOJ Co-ordinator discusses addresses the issue of unsolicited anti-virus warning messages and the lack of a common name for each virus.

Anti-virus spamming and the virus naming mess: part 2
addresses the lack of a common name for each virus.

Malware prevalence
