

Wireless Hacking

Authors: Lee Barken, Matt Fanady, Alan Koebrick, Michael Mee and Marc Palumbo; Foreword by Rob Flickenger

As the cost of wireless technology drops, the number of Wi-Fi users continues to grow. Millions of people have discovered the joy and delight of "cutting the cord." Many of those people are looking for ways to take the next step and try out some of the cutting edge techniques for building and deploying personalised Wi-Fi networks, both large and small. This book shows Wi-Fi enthusiasts and consumers how to do exactly that.
