

6. In the next window, you will be asked to choose the manner in which you would like to connect to the Internet. Choose the second option, which is 'Set up my connection manually'. Click 'Next' to continue.

7. In the next window, Windows XP will ask for information regarding how you would be physically connecting to the Internet, such as using a Dial-up modem or a broadband connection. By default, the option 'Connect using a dial-up modem' is chosen. Simply click 'Next'.

8. This window lets you specify your ISP's name. If your ISP is BSNL, enter that name in the box and click 'Next'. If you are using multiple ISP's for your Internet access, you will need to specify different names for each one.
