

1.1 Ground Zero

The essential equipment you need includes a complete set of screwdrivers, or one of those neat multi-headed screwdrivers with replaceable heads; an anti-static wrist strap; small needle-nose pliers (forceps from a dissection box can also be used here); and a small piece of thin but hard wire. The Philips-head (or the star-shaped) screwdriver will be the most-used one on any given day when you open a cabinet and install any device. The pictures on these pages should give you a better idea of what is needed.

The human body emits minute electrical charges under certain circumstances. This is what we call static

A neat multi-headed screwdriver is a must-have
