

A PCI sound card starts at Rs 600 for a 2-channel sound card, and can go up to Rs 18,000: these have top-of-the-line features normally found on high-end home theatre systems.

LAN Cards

Newer motherboards come with on-board LAN; however, those that don't need to have a LAN card installed on the motherboard to be able to connect to a network. LAN cards are available in the PCI version, apart from other formats, and when upgrading, you may need to purchase one. With the advent of Internet via cable, LAN cards have now become a part of a standard home computer. Common LAN cards such as 10/100 LAN cards from D-Link are available for around Rs 450.

TV Tuner Cards

TV tuner cards are not so common, however, with falling prices, most users can afford one. They offer the advantage of being able to watch TV on your computer, and you can also capture content you would like to watch later. Moreover, you don't need to fight for the TV remote any more—you can use the PVR (Personal Video
